

## **ŠKODA choose Illumina Gridspot LED**

Founded in 1895 ŠKODA is one of the world's most recognisable and oldest car manufacturers, with over 100 years of production.

Mansfield ŠKODA saw an opportunity to replace it's outdated lighting when it was recently refurbished, incorporating a more aesthetically pleasing solution.

That solution was the Illumina Gridspot LED spotlight. This contemporary looking spotlight was the perfect fit for the brand and it's showroom, due to its flexibility and excellent CRI.

Flexible lighting was high on the agenda when it came to refurbishing the Mansfield showroom in order to adapt to the ever changing car displays.

ŠKODA, said:

" The store looks great, the cars are now selling direct from the showroom because the colours look so great thanks to the new Illumina lighting."
