## A Scientific Supply

Project : Lincoln University Technical College

Client : Elecomm

Product : Steel Wire Cable Tray & uPVC Trunking

Marco, a leading uPVC Cable Management Company, and the UK's largest manufacturer of Steel Wire Cable Tray, has supplied both Steel Wire Cable Tray and uPVC Trunking to contractor, Elecomm, as part of their work at a specialist engineering and science college in Lincoln.

Contractor, Willmott Dixon is managing the £7m scheme at Lincoln University Technological College (UTC) that includes the construction of a new state of the art building and refurbishment of an existing Grade II listed building on the Greestone Centre site.

Elecomm is managing both the new electrical installation, and the upgrade of existing school. Marco's Steel Wire Cable Tray has been utilised across both buildings whilst the uPVC Trunking has been utilised throughout the modern education facility.

Jeff Kerridge, Sales Manager of Marco Cable Management commented; "This project demonstrates how Marco's products work within both modern and historic environments. Our products have been developed to ensure that they are able to meet the needs of a range of environments, providing a single source of supply for our diverse customer range."

These two buildings will make up the specialist engineering and science college, and are ready for full time use from September 2015. Lincoln UTC will open to school 200 students aged 14 to 18 years, increasing to a maximum of 640 from September 2017.
