

For immediate release: 17th November 2016

Nightsearcher launches High Performance Galaxy 2400 Portable Rechargeable LED Work Light

With 28 years of experience, Nightsearcher has been a market leader in designing and supplying portable lighting solutions for the industrial industry, police, fire and rescue services, MoD, utility groups and rail infrastructure where safety and reliability are paramount.

Nightsearcher offers a range of high quality rechargeable floodlights, searchlights, head torches and flashlights designed to give many years of service.

The Galaxy-2400 is just one of a new range of portable floodlighting solutions to meet the ever changing demands for industrial applications, offering an alternative to mains driven lighting it has 3 light power modes - 2400/1200/720 Lumens, giving you the flexibility to switch light sources including a dimmer function option. It's li-ion rechargeable battery ensures cable free lighting for both indoor and outside applications, It has a IP65 weather resistance rating.

Using a combination of high performance LEDS with an opaque diffused lens the units gives a completely shadow free, wide angle dispersal flood making them ideal alternatives to fluorescent lights operating from the mains. The Galaxy 2400 operates silent and generates no heat.

Ideal for the construction industry, the Galaxy-2400 is extremely robust with its IK08 (ABS) impact resistant case. The lightweight, cordless design conveniently folds in two making it compact and protects the lights from breakages in transit while the integrated handle makes it extremely portable. The rechargeable work light opens out to 180° giving you versatility to light up all work sites, using the 10m flood beam distance. The Galaxy-2400 is powered by a 7.4V 8800mAh rechargeable Li-ion battery with an impressive run time of up to 9 hours and a recharge time of 4.5 hours.

This is available now for £85.95

There are 2 optional accessories:

- 2m Tripod
- Vehicle Charger
