

## ABOUT

Atkore Marco have supplied Apollo MTD3 uPVC Trunking as part of the new offices and distribution premises for Slumberjack Coffee in Antrim, Northern Ireland.

### NAME OF PROJECT

New offices for Slumberjack Coffee

### CLIENT

DJ Electrical / Slumberjack Coffee

## DESCRIPTION

Local Coffee distributor Slumberjack Coffee had new purpose built office and distribution premises in Antrim, N.Ireland which required cable management solutions.

Their mission statement, 'The MIGHTY LITTLE COFFEE BEAN has the power to WAKE OUR MINDS in the morning, to DELIGHT OUR TASTE BUDS and to STIMULATE OUR SENSES. We are on a coffee mission. We will not rest until we have the FINEST BEANS, the BEST ROASTING PROCESSES and the ULTIMATE CUP OF COFFEE for you. We are ENTHUSIASTS, DEVOTEES, FANATICS and ADORERS of fine coffee'

Technical Sales Manager, Gareth Howes states, "When there is a change to for instance socket and data point height, Atkore Marco dado trunking is a great solution as it is flexible and can be mounted at whatever height required. In this sort of office environment if added power or data requested it's only a matter of taking the trunking lid off and installing the extra cables required for the additional outlets."

- ANTRIM

## SOLUTION

One of the challenges for this installation was that Power and Data were to be kept below the desks in the offices.

The fact that Atkore Marco trunking was used allowed the designer to meet this requirement as the trunking can be mounted at any height.

*We use Atkore Marco trunking all the time. It is easy to install and there's a good solid feel to it. The lids fit very well to the base with a good solid click. Local stock at WS Mercer Ballymena is essential as there is always some extra parts required as the project changes are made.*
