

SEVERUS

The Severus direct range of surface mounted LED guide lights are quick and easy to fit. The clever design means that you can now fit guide lights when you are not able to cut holes in the wall. Providing up to 190 lumens of warm white light. Packed with the latest LED technology to ensure the projection is kept to a minimum. Direct fittings are available in round, square and landscape, with a choice of grey or black finishes. More Severus overleaf

SURFACE MOUNTED

- ABS plastic & frosted polycarbonate
- LED module (SMD 3014)

SEVERUS RANGE
SURFACE MOUNTED GUIDE

Discreet and easy to fit. The Severus range has the latest in integrated LED technology, keeping the fitting as slim as possible

The clever design means that you can now fit guide lights when you are not able to cut holes in your wall

Manufactured from polycarbonate, they are the ideal choice for coastal locations. Available in a choice of direct and indirect, shape and finish. The slim profile and integrated driver allows us to keep the projection from the wall to a minimum and the IP rating is ensured by the gasket and the diffuser when it is fitted into place

Designed for **ease of installation** and **function**
