

# WS7-EcoT

**NEW  
PRODUCT**

7 litre Vented Water Storage Heaters  
with 24 hour, 7 day programmable timer

Building on our best selling WS7 water heater, the EcoT model contains an integral timer that offers the ability to program multiple on-off times throughout the week. This makes it perfect for installations where people are not using the water heater all of the time, like offices, as the heater can be programmed to come on only when people need it.

Plumbed into the mains supply, this energy efficient wall or undersink mounted water heater is perfect for dishwashing and similar applications.
