Airflex Pro

Semi rigid ducting

Key Features

- Zero leakage ensures highest performance
- 70% time saving on installation
- Interchangeable ducting system (75mm round / 51mm x 114mm oval) without any hydraulic pressure loss
- Compact, suits narrow joists and low ceiling voids
- Durable with high crushability (13 kN/m²)
- Smooth bore with antistatic and antibacterial lining
- Easy to clean when installed
- SAP Appendix Q eligible ducting (non-jointed)

Mix and Match, “Oval or Round” = No loss of Performance

A quick and easy to fit system of semi-rigid ducting that can result in up to 70% time saving during the on-site installation process, compared to rigid or spiral duct methods.

This innovative system uses low resistance and antibacterial smooth round and oval tubes which connect each room to the heat recovery or ventilation unit via an air distribution box.

The Airflex Pro Oval ducting is designed to equal the hydraulic Performance of Airflex Pro Round so both types can be used within the same system without a loss of performance.

Semi rigid ducting without joints. Performance data is now recognised by the U.K Government as an input for Standard Assessment Procedure (SAP) calculations via Appendix Q.

Accessories

Airflex Pro Clips

Round and oval ducting clips

Key Features

- Securely fixes both Airflex Pro Round and Airflex Pro Oval Duct
- Compact height allows duct fixing within narrow joist areas and low ceiling voids
- To NHBC MVHR Guidance 3.2
- Single person installation
- Keeps Airflex Pro Round / Oval taut and neat on installation
- SAP Appendix Q eligible zero leakage ducting
- Keeps ducting off building fabric to reduce noise transmittal

Airflex Pro Round and Oval Ducting Clips

Flexible, innovative, meeting industry best practice standards for installation. Airflex Pro Round and Oval clips are the only professional solution for fitting SAP Appendix Q eligible, Airflex Pro Round and Airflex Oval Zero Leakage duct systems.

These compact ducting clips have been specifically designed to securely fix both Airflex Pro Round and Oval Ducting systems. In narrow or confined areas, while keeping ducting off the building fabric to reduce noise transmission, they should be spaced at 750mm intervals to keep Airflex Pro / Airflex Oval neat and tidy on installation in accordance with NHBC guidance 3.2.

Typical Installations

Testimonials

“ As a contractor working throughout the UK installing residential HVAC equipment in new and refurbishment houses I have no hesitation in recommending Airflex Pro for the ventilation ducting systems.

The quality of material is second to none and the flexibility of ducting made it possible to install very quickly even in narrow spaces.”

Director of Cotswold Efficient Energy Centre

- Voted 2010 National Renewable Project of the Year H & V Awards
- Voted 2010 National Renewable Energy Company of the Year B.R.E. Award

“ I am very pleased with your semi-rigid ducting which I've begun using immediately. I am particularly impressed with its ability to quickly fit to each component, and also its leak-proof design thanks to the easy-to-fit sealing rings. The Airflex Pro ducting has already paid for itself in time saved!”

Design Architect at Persimmon Homes

“ Specification of Airflex Pro has added value and raised the standard of the ventilation system throughout the dwelling, while contributing to a lower carbon environment for the homeowner.”

Project Manager at Millgate Homes

“ The installation went according to plan and the whole system is working very well... Thanks for your excellent service!”

Quantity Surveyor at Miller Homes

Accessories

Airflex Retro

Discreet coving ducting

Key Features

- Designed for both new build and renovation projects
- Easy installation in 3 steps
- 40% saving on installation time over conventional ducting systems
- COANDA effect supply valves enable a better range of circulating ventilation
- Imminently suitable for standard footprint building design
- Can be painted to suit inside décor of dwelling
- Negates the need for suspended ceiling to hide the ducting system
- Fire retardent to EU-B2 rating DIN 4102

Retro Ducting System

This versatile and innovative ducting is designed around a coving system that can be incorporated within the visible part of the house or flat and is ideally suited to a standard footprint building design where there is a common entrance hallway with all the rooms branching off the hallway.

Retro ducting is lightweight, versatile and easy to fit making it the perfect choice for a discreet coving ducting application. This system can be used for System 4 (Mechanical Ventilation with Heat Recovery) in a supply and extract function and also System 3 (Mechanical Extract Ventilation) as an extract only duct system.

Accessories

How Retro Ducting Works (System 4 - MVHR)

1. Linked to an Airflow Duplexvent Domestic Heat Recovery unit that saves heat from indoors and transfers it to incoming fresh air providing an excellent indoor air quality.
2. Unique Retro Duct combination distribution box collects extracted "stale, moist" air from kitchen and bathroom whilst distributing fresh air to bedrooms and living rooms. It also absorbs some of the sound from different rooms that can be transmitted through the ventilation system.
3. Retro Ducting made from compressed EPS, looks part of the inside décor of the house as it carries the building ventilation air to and from its destination. The fixing clamps and circle system make installation a simple 3 step process.
4. Stylish 'COANDA' effect Retro air valves for supply and extract. The aerodynamic phenomenon known as the COANDA effect in conjunction with strategic placement of these air valves causes the supply air from the valve to 'stick' longer to the surface of the ceiling allowing it to be thrown further across the room before it drops at the same velocity that it would if the valve was in free air. This enables a better range of circulating ventilation in the supplied rooms ensuring a high level of good indoor air quality.
5. Supply / extract to Heat Recovery unit achieved through Airflow ISO - pre insulated piping (page 223).
6. Supply / extract to outside air.

- = Supply Air
- = Intake Air
- = Extracted Air
- = Exhaust Air

Step 1

Step 2

Step 3

Accessories

How Retro Ducting Works (System 3 - MEV)

1. Linked to an Airflow - Mechanical Extract Ventilation (MEV) unit that extracts from moisture producing or wet rooms allowing fresh air in via natural ventilation.
2. Retro Ducting made from compressed EPS, looks part of the inside décor of the house as it carries the building ventilation from its source. The fixing clamps and circle system make installation a simple 3 step process.
3. Extract valves combine a low profile stylish front for extraction of air from required areas. This enables a good range of circulating ventilation as extracted air is replaced through natural ventilation.
4. Natural ventilation replaces extracted stale / moist air through window sills, trickle vents and doors.
5. Extract to outside air.

- = Extracted Air
- = Exhaust Air
- = Extracted Air

52641007	ø100mm x 45m	52641004	ø150mm x 6m
52641008	ø125mm x 1m		

- Flexible PVC ducting for general ventilation connection applications. Highly versatile, non degrading, operating temp of +6° – +50° fire resistance tested to BS 476. To overcome awkward installation where rigid duct is unable to be installed. Can be used with fans for kitchens, bathrooms, toilets, cooker hoods etc. For optimum performance duct should be as straight and taut as possible to ensure "best practice" installation.

Airflex Combi Flexible Ducting

Part No.	Dimensions	Part No.	Dimensions
9021285	ø100mm x 3m	9021287	ø152mm x 6m
9021292	ø100mm x 5m	9021290	ø152mm x 10m

9021294	ø152mm x 5m	9021291	ø200mm x 10m

- PVC coated aluminium ducting for general ventilation connection applications, with a degree of outer protection. Highly versatile, non degrading fire resistance tested to BS 476. Operating temp +6° – +50° coated in PVC to add extra protection from corrosion and tear damage. Can be used with fans for kitchens, bathrooms, toilets, cooker hoods etc. For optimum performance duct should be as straight and taut as possible to ensure "best practice" installation.

- To use: Look across for your air volume, look up to the dimension of flexible ducting, look left for the resistance per meter.

Part No.	Dimensions
52662701	ø102mm x 10m
52662702	ø127mm x 10m
52662703	ø152mm x 10m
90000503	ø160mm x 10m
90000504	ø180mm x 10m

- Aluminium re-enforced ducting for general connection applications, with a good degree of outer protection. Highly versatile, non degrading, fire resistant tested to BS 476. Re-enforced with a tough wire spiral to maintain bore and reduce collapse. To overcome awkward situations where rigid duct cannot be installed. Can be used with fans for kitchens, bathrooms, toilets, cooker hoods and also Mechanical Extract Ventilation and Heat Recovery ventilation installations.

For optimum performance duct should be as straight and taut as possible to ensure "best practice" installation.

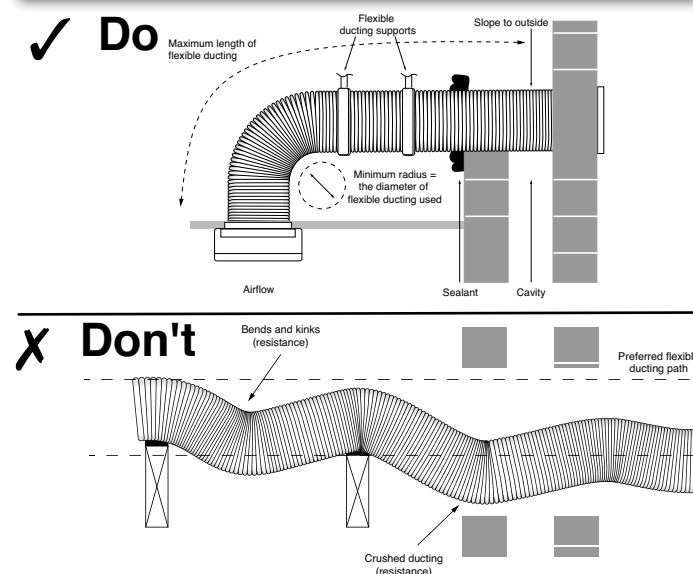

- Insulated and re-enforced aluminium ducting for general connection applications, where thermal conductivity and resistance are important. (outside the insulated envelope of a house for example). Duct can be used to connect fans in kitchens, bathrooms, toilets etc and also Mechanical Extract Ventilation and Heat Recovery Ventilation.

For optimum performance duct should be as straight and taut as possible to ensure "best practice" installation.

Airflex re-enforced aluminium insulated flexible ducting is made up with 25mm microfibre and has a thermal conductivity λ in W/m.K at 10°C of 0,036 which is less than 0.04W/(mK) which is the maximum allowed within the requirements of Domestic Ventilation Compliance Guide 2010, and is therefore compliant. It is suitable for temperatures of -30°C to +120°C and can be used up to a maximum 2000 Pa positive.

It has been tested to Fire rating BS 476 Part 6 Fire Propagation Test (passed) Part 7 Surface Spread of Flame (class I rating) Part 20 Fire Resistance (60 minutes).

Air Round Rigid Ducting

- White plastic round rigid ducting can be used as ducting as part of a larger system or as a component cut down. Where possible to ensure "best practice" and "installed performance" of the fan or ventilation unit it is advisable to use a rigid or semi rigid duct system to minimise bends and duct resistance. Fire tested to UL94 v2 / BS 476 these PVC rigid ducts are available in a versatile and wide range of sizes.

M = Male connection

Duct Insulation

- Insulation wrap provides insulation for all Airflow's duct systems where a degree of thermal conductivity / resistance is an issue (outside the thermal envelope of the house for example).

Airflow duct insulation wrap has been Fire Tested in accordance with BS 476, part 6, 7 and 20. Its thermal conductivity is 0.005 W/mK for 4mm thickness and therefore complies to the requirements of Domestic Ventilation Compliance Guide 2010.

Adhesive aluminium tape for the fitting and installation of aluminium insulation wrap. Non hardening adhesive.

Insulation Wrap

Part No.	Dimensions
90000010	Round/oval Airflex Pro - 295mm x 25m
90000011	100mm Airound - 345mm x 12.5m

Accessories

Airflex ISO - Insulated Rigid Ducting

- ISO pipe ducting, pre-insulated.
- Tough, durable, anti-static EPP construction.
- Fire retardant to EU-B2 - DIN 4102.
- Choice of components to suit any layout.
- Typically connects to MVHR units and distribution boxes and to outside for venting.
- Pre insulated duct for when the ventilation unit is outside the warm envelope of the house. This helps to reduce condensation.

Airflex ISO Pipe

Part No.	Dimensions
9041147	ø125mm x 2000mm
90000505	ø160mm x 950 mm

9020154	ø200mm (A-245 x B-80mm)

Metal Adjustable Air Valve (E)

Part No.	Dimensions
9041172	ø125mm

Fire protection extract valve

Part No.	Dimensions
90000126	ø125mm

Fusible link release closes the valve when temperature reaches 72°C sealing the duct from fire and smoke ingress. Fusible link release sits inside duct behind the valve approx 35mm.

Accessories

Speciality Air Valves

- A range of special air valves designed for when a greater degree of aesthetics is required.

Coanda Supply Air Valve - White

Part No.	Dimensions
9041166	ø125mm

COANDA effect valve for supply enables a better range of circulating ventilation ensuring a high level of indoor air quality. Can be used for extract without coanda effect.

Aluminium Wall Grille

Part No.	Dimensions
9041175	Grille for wall mounting from aluminium 200 x 50mm (inner), 250 x 110mm (outer) Air volume adjustable via horizontal and vertical fins fits with straight wall outlet (9041143) and 90° Wall outlet (9041144) also fits to 204mm x 60mm ducting

Stylish Suppy/Extract Valve

Extract Air Valve - White

Part No.	Dimensions
9041173	ø125mm wall/ceiling

Accessories

Airflow Airese Adjustable Air Valves

- Airese air valves are designed to provide a complete demand controlled ventilation solution. The valves automatically respond to conditions within specific rooms such as kitchens and bathrooms and then operate accordingly to meet the ventilation required for that type of room.
 - Models include constant flow, pull cord activator, humidity activation, boost-electric, boost battery and humidity with timer.
- Intelligent self adjustable valves for the complete demand control solution specifically for use with MVHR and other ducted ventilation systems.

White

Part No.	Dimensions

Accessories

Venting Kits

- A range of connecting ducts and grilles to connect your Airflow fan to the outside, already with a grill provided. Various sizes and colours available. Will also connect to new Airflow fans, check the diameter required.
- These venting kit grilles comply with the requirements of the Domestic Ventilation Compliance Guide 2010 that states terminal opening is a minimum of 90% of the free area of the ducting being used.

Cavity Wall Kit - Terracotta

Part No.	Dimensions
72643201	ø100mm x 350 Rigid duct
72643203	ø150mm x 350 Rigid duct

Cavity Wall Kit - White

Part No.	Dimensions
72643202	ø100mm x 350 Rigid duct
72643204	ø150mm x 350 Rigid duct

High Rise Cavity Wall Kit - Cowl / Rubber Seal

Part No.	Dimensions
9021451	ø100mm Rigid duct

Flexible Wall Kit - Terracotta

Part No.	Dimensions
72643601	ø100mm 3m Ducting
90000437	ø125mm 3m Ducting
72643603	ø150mm 3m Ducting

Flexible Wall Kit - White

Part No.	Dimensions
72643602	ø100mm 3m Ducting
90000438	ø125mm 3m Ducting
72643604	ø150mm 3m Ducting

- This high rise cavity wall kit enables installation via insertion from the inside of the dwelling, so no access to the outside of the property is required.

In-Line Flexible Ducting Kit

Part No.	Dimensions
9041183	ø100mm x 6m

- For use with Aventa 100 and Aventa 100T. Comes with exhaust valve, duct, outside gravity flap and fitting circlips

In-Line Flexible Ducting Kit

Part No.	Dimensions
9041184	ø125mm x 6m

- For use with Aventa 125 and Aventa 125T. Comes with exhaust valve, duct, outside gravity flap and fitting circlips

In-Line Flexible Ducting Kit

Part No.	Dimensions
9041185	ø150mm x 6m

- For use with Aventa 150 and Aventa 150T. Comes with exhaust valve, duct, outside gravity flap and fitting circlips

Accessories

Intumescent Fire Collars

Round		Rectangular	
Part No.	Dimensions	Part No.	Dimensions
90000108	75 - 82mm dia	90000107	205mm x 60mm
90000109	100 - 110mm dia		
90000110	125 - 130mm dia		
90000111	150 - 160mm dia		

Fire Collar - prevents spread of fire, smoke and hot gasses where fire compartment wall / floor is penetrated by plastic pipes.

- Contain intumescent material which reacts under the influence of heat on the duct pipe to form a insulation plug preventing smoke and fire passing through to the adjoining rooms. Suitable for any type of building where a fire compartment wall or floor is penetrated by plastic duct pipes. Fixed by mounting lugs these collars can be used without the need for encapsulation in walls or brickwork.

Flame Stopper Safety Sleeve

Safety Sleeve	
Part No.	Dimensions
9041311	80mm dia
52662301	125mm dia
52662401	150mm dia

Flame Stopper Safety Sleeve - fits onto fans or air valves to prevent spread of fire in HVAC systems.

- The safety sleeve is constructed from intumescent material. This reacts under the influence of heat and forms an insulation plug preventing smoke or fire passing through the adjoining rooms. These sleeves need to be encapsulated in walls or brickwork to be able to operate correctly.

Remote Switches, Controllers & Sensors

Air Quality Sensor	
Part No.	Dimensions
9041575	W125 x H75mm x D30mm

Air Quality Sensor
Single phase AC currant -max 1.0 amp

- Air quality sensor suitable for domestic and commercial ventilation systems. This will switch fans on if condensation rates rise quickly or the set valve exceeded. An adjustable timer over run is engaged after the condensation rates are below sensor settings.
- The integrated sensor reacts to oxidable gases and pollutants such as: carbon monoxide, alcohol, formaldehydes, benzene, solvent, methane, tobacco etc

Part No.	
90000550	Single and tripple pole

On/off - 2 speed with 2x neon switch

Part No.	
90000551	Single and double pole

Accessories

Variable Speed Fan Controller

Part No.

9041033 Maxivent / Supervent
iCON 60

1 Amp Reversible Speed Controller

Part No.

9041566 Reversible fans

1 Amp Stepless Speed controller

Part No.

9041565 Single phase fans

3 Amp Stepless Speed Controller

Part No.

9041569 Single phase fans

QuietAir 150 VS controller

Part No.

90000514 QTI50VS

PIR Motion Sensor Timer

Part No.

51969702 c/w timer 3 - 30 mins

Electrical Humidistat On / Off

Part No.

9041570 Humidistat 30% - 90%

Single gang back box

Part No.

90000552 35mm deep

Double gang back box

Part No.

90000553 35mm deep

Commercial Fan Speed Controllers

Speed Controller 1 AMP

Part No.

9021055 100% speed controller for
linear control of fans

Speed Controller 3 AMP

Part No.

9021056 100% speed controller for
linear control of fans

Speed Controller 6 AMP

Part No.

9021057 100% speed controller for
linear control of fans

Speed Controller 10 AMP

Part No.

9021058 100% speed controller for
linear control of fans

- New high voltage protection adjustment on 3-Amp and 6-Amp controllers.
- Low voltage "No Stall" adjustment on 3-Amp and 6-Amp controllers.
