## BLE IS AT THE FOREFRONT OF LIGHTING AND EMERGENCY POWER SYSTEMS

BLE has manufactured emergency lighting and power systems for over 40 years. We also now provide Energy Efficient LED Lighting, offering anything from products to a full turn-key solution of design through to install and commissioning.

EMERGENCY LIGHTING  
ENERGY EFFICIENT LIGHTING  
EMERGENCY POWER SYSTEMS

## THE POWER BEHIND LIGHTING

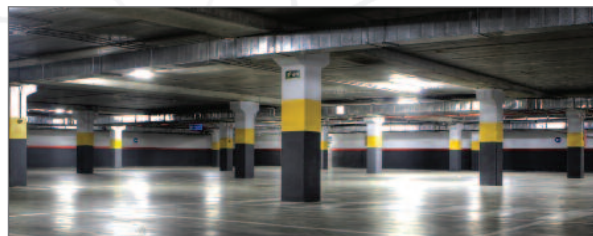

# YOUR SPECIALIST LIGHTING PROVIDER

BLE Lighting & Power Limited is a long-standing, established, dedicated lighting and power specialist providing emergency lighting, energy efficient lighting and emergency centralised power products and solutions to a wide range of clients.

We have taken care and time to source and manufacture high quality products to enable our customers to buy and sell with confidence.

Our product range has evolved and we have increased our offering of LED products in line with the lighting market. At BLE Lighting & Power Ltd we pride ourselves on our ability to listen and understand our customers' requirements and develop and provide solutions and services to specifically meet those needs.

- We aim to despatch all our core lighting products from stock on a free of charge next day delivery service (minimum order applies).
- Thanks to our in-house, UK manufacturing facility, we are able to build and supply bespoke products (minimum order quantities apply).
- For larger quantity orders, we are able to provide customer branded product, sourced direct from our partners in the Far-east.
- As an experienced emergency lighting supplier, BLE Lighting & Power Ltd is able to offer a lighting scheme design service.
- All Self-contained emergency light fittings are tested to BS EN 69598-2-22. All Self test fittings comply with BS EN 50172.
- Subsequent to the design phase, BLE Lighting & Power Ltd is able to supply products, followed by full install and commissioning.
- We have a team of experienced emergency power specialists able to service customer requirements for centralised back-up power systems, meaning we can offer a range of solutions where emergency lighting is required.
- Should you require standard, energy efficient lighting, we can offer everything from high-quality products to a full turnkey solution incorporating design, supply and install of the project.

WE AIM TO BE NOT  
JUST A LIGHTING  
SUPPLIER, BUT ALSO A  
LONG TERM  
DEDICATED PARTNER

## HIGH POWERED LED EMERGENCY BULKHEAD

### FEATURES

- High Light Output
- Low Current Draw
- Modern Design
- Surface Mounted
- Charge Healthy LED Indicator

### SPECIFICATIONS

- 7 X High Powered LED
- IP65 Protection Rating
- 3-Hour Emergency Duration
- Maintained Operation - Dual Circuit
- Polycarbonate Housing
- Polycarbonate Transparent Diffuser
- Tested to BS EN 69598-2-22
- Self Test Complies to BS EN 50172

### DIMENSIONS

260mm x 140mm x 40mm

### OPTIONS

- Available As 24V, 50V, 110V & 230V slaves
- Self Test Option Available
- Semi-Recessing Kit Available
- Drop Legend Kit Available (See Page 30)
- 14 X LED Higher Light Output Options Available
- Corridor Lens Version Available
- Non-Maintained Version Available

## BE3D

## EMERGENCY LED HANGING EXIT SIGN

## FEATURES

- LED Hanging Exit Sign
- Traditional Design
- Charge Healthy LED Indicator
- Adjustable Drop Length
- Supplied With Down Arrow Legend

## SPECIFICATIONS

- LED Light Source
- IP20 Protection Rating
- 36 Metre Viewing Distance
- 3-Hour Emergency Duration
- Maintained Operation - Dual Circuit
- Polycarbonate Enclosure
- Tested to BS EN 69598-2-22

## DIMENSIONS

340mm x 45mm x 214mm

# BE3FR

## EMERGENCY FULLY RECESSED BLADE EXIT SIGN

### FEATURES

- LED or 8-Watt Blade Exit Sign
- Fully Recessed Design
- Charge Healthy LED Indicator
- Supplied With Choice of Legend Direction
- UK Manufactured

### SPECIFICATIONS

- LED or 8-Watt Fluorescent Tube
- IP20 Protection Rating
- 36 Metre Viewing Distance
- 3-Hour Emergency Duration
- Maintained Operation - Dual Circuit
- Metal Ceiling Box Assembly
- Choice of Metal Bezel
- High Quality Engraved Legend
- Tested to BS EN 69598-2-22

### DIMENSIONS

310mm x 158mm x 177mm

### OPTIONS

- Available as LED or 8-Watt Fluorescent
- Available in White, Brass or Chrome

PRODUCT CODE	DESCRIPTION
<b>To Order - Select a Box Assembly</b>	
<b>B3/LED/M3</b>	LED Maintained Box Assembly for Fully Recessed Fittings
<b>B3/M3</b>	8-Watt - Maintained Box Assembly for Fully Recessed Fittings
<b>Add your choice of Bezel</b>	
<b>BER/W</b>	White Fully Recessed Bezel
<b>BER/B</b>	Brass Fully Recessed Bezel
<b>BER/C</b>	Chrome Fully Recessed Bezel
<b>Finally Select your Legend</b>	
<b>BE3/LGD/E</b>	BE3 Down Arrow Legend - Engraved
<b>BE3/LGLR/E</b>	BE3 Left/Right Reversible Legend - Engraved
<b>BE3/LGU/E</b>	BE3 Up Arrow Legend - Engraved

# ONTEC G

## EMERGENCY SURFACE MOUNT OR RECESSED LED EXIT SIGN

### FEATURES

- LED Exit Sign
- Surface Mount as standard (Recessing Kit Available)
- Charge Healthy LED Indicator
- Supplied with Legend Pack

### SPECIFICATIONS

- LED Light Source
- IP20 Protection Rating
- 25 Metre Viewing Distance
- 3-Hour Emergency Duration
- Maintained Operation - Dual Circuit
- Polycarbonate Enclosure
- Tested to BS EN 69598-2-22

### OPTIONS

- Self Test Option Available
- Recessing Kit Available as optional extra

### DIMENSIONS

251mm x 200mm x 29mm

**NEW  
IN  
2016**

PRODUCT CODE	DESCRIPTION
<b>ONTEC G E1B 301 M ST</b>	LED - Surface Mount/Recessed Exit Sign - White - 3 hour Maintained - Supplied with Legend Pack

Further specification and pricing details contact **01246 432325** or visit **www.blelighting.co.uk**

# ONTEC S - Drop Legend

## EMERGENCY SURFACE MOUNT BLADE EXIT SIGN

### FEATURES

- High Light Output
- Low Current Draw
- Modern Design
- Surface Mounted
- Charge Healthy LED Indicator
- Can be used as part of emergency Lighting Design

### DIMENSIONS

260mm x 140mm x 40mm

### SPECIFICATIONS

- 7 x High Powered LED
- IP65 Protection Rating
- 3-Hour Emergency Duration
- Maintained Operation - Dual Circuit
- Polycarbonate Housing
- Polycarbonate Transparent Diffuser
- Clip on Drop Legend Kit
- Tested to BS EN 69598-2-22

### OPTIONS

- Legend Pack Supplied Enables Various Arrow Directions

PRODUCT CODE	DESCRIPTION
--------------	-------------

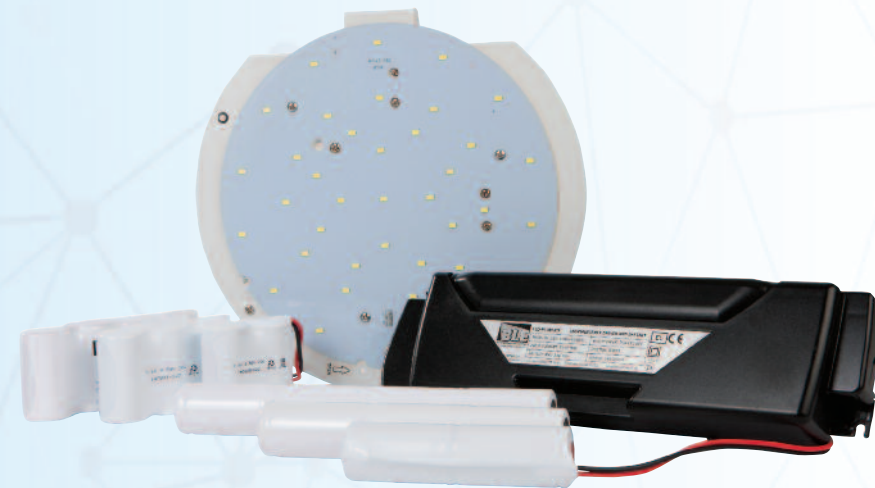

**To Order - Select an ONTEC S Fitting from page 4 / Add your drop legend kit**

<b>ONTEC S Legend Kit</b>	Hanging Drop Legend for ONTEC S Range - Supplied with Exit Sign Pictogram
---------------------------	---

# LED Panel Light

## ENERGY EFFICIENT LED PANEL LIGHT

### FEATURES

- High Light Output
- Highly Energy Efficient
- High Quality Drivers
- Convenient Design for Recessed Mounting
- 5-Year Warranty as Standard

### SPECIFICATIONS

- SMD2835 LED Chips
- Output - 90 Lumens per Watt
- 5000K Colour Temperature
- Metal Enclosure
- Opal Diffuser
- 'No Flash' Driver

### DIMENSIONS

See Product Description Below

### OPTIONS

- Emergency Pack Available
- Available with Microwave Sensor
- Surface Mounting Kit Available

#### PRODUCT CODE

#### DESCRIPTION

- |                     |  |
|---------------------|--|
| <b>LED-PL-5-40W</b> | LED Panel Light - 40 Watt - 5000K - 600mm x 600mm x 10mm - No Flash Series Driver  |
| <b>LED-PL-5-54W</b> | LED Panel Light - 54 Watt - 5000K - 600mm x 1200mm x 10mm - No Flash Series Driver |

# Induction Lighting

In addition to our range of LED Lighting, we also offer a range of Energy Efficient Induction Lights. Aimed at industrial areas, being suited for use in higher operating temperatures and able to be used at a wide variety of ceiling mounting heights, the range covers a broad spectrum of applications.

We offer and supply Low Bay, High Bay or Induction Floodlights in 100watt, 150watt or 200watt variants. Please call the sales team for more details.

Further specification and pricing details contact **01246 432325** or visit **www.blelighting.co.uk**

# Inverters

## EPS II STATIC INVERTERS

### FEATURES

- Transformer Designed
- Single and Three Phase Options
- True Synchronised Three Phase Output (Three Phase Only)
- High Fault Clearance Capability
- Multiple Cable Entries
- Touchscreen Panel (Three Phase Only)

### SPECIFICATIONS

- Transformer designed and providing a pure sinewave output
- Single Inverter technology reduces component count and improves MTBF, thereby increasing system integrity and giving peace of mind
- Quality is ensured, the cubicles are manufactured from high grade steel, finished in white textured coating for durability and as standard are rated to IP20
- The valve regulated batteries, are derated for end of life, providing ten years service life
- The front mounted touch screen panel ensures ease of use for diagnostics and interrogation of the system
- The BLE EPS Static Inverters have 2 maintained and 1 non maintained output as standard
- No break output is also available
- Standard rating range from 2Kw to 69Kw

# Central Battery Units & Sealed Lead Acid Batteries

### FEATURES

- 10-Year Working Life, Sealed Lead Acid Batteries
- Multi Function Digital Meter (PLY Only)
- Manually Operated Test Timer with Four Selectable Time Durations
- High Voltage and Low Voltage Alarm
- Low Voltage Disconnect with Zero Standby Current

### OPTIONS

- Choice of Output Voltages – 24V, 50V & 110V
- Maintained or Non-Maintained Operation
- One Hour or Three Hour Duration

### Sealed Lead Acid Batteries

- High Efficiency SLA Batteries
- 10 Year Working Life
- Batteries Designed by BLE Lighting & Power Ltd
- Complies to EN60896-21 & EN60896-22

PRODUCT CODE	DESCRIPTION
<b>CS-24-12</b>	12V - 24Ah - 196mm x 131mm x 166mm
<b>CS-36-12</b>	12V - 36Ah - 229mm x 138mm x 213mm
<b>CS-64-12</b>	12V - 64Ah - 259mm x 169mm x 213mm
<b>CS-100-12/2</b>	12V - 100Ah - 407mm x 174mm x 238mm

# Mini LED Inverters

## PURE SINE WAVE LED STATIC INVERTER

### FEATURES

- Specifically Designed for use with Led Luminaires
- True Sine Wave Output
- Designed In Accordance with Bs5266

### SPECIFICATIONS

- Range of Ratings from 50 Watts to 400 Watts
- 3 Hour Emergency Duration
- Steel Housing

PRODUCT CODE	DESCRIPTION
<b>STI-LED-50</b>	LED Static Inverter - 50 Watt
<b>STI-LED-120</b>	LED Static Inverter - 120 Watt
<b>STI-LED-200</b>	LED Static Inverter - 200 Watt
<b>STI-LED-400</b>	LED Static Inverter - 400 Watt

Further specification and pricing details contact **01246 432325** or visit **www.blelighting.co.uk**

# Autoglow 3

## NEXT GENERATION IN EMERGENCY LIGHTING CENTRALISED AUTOMATIC TEST SYSTEM

### FEATURES

- The Autoglow 3 system is a fully addressable, centralised automatic test system designed for both self contained or slave luminaires. The system has been designed to comply with EN 62034 for automatic testing of emergency lighting and can be accessed via devices such as PC, Tablet & Smartphone for real time status monitoring while automatically maintaining a 4-year rolling history of test results. To aid management of the Autoglow 3 system it has an in built facility to automatically notify the user of any faults via e-mail (up to three addressees)

- Built In Web Server
- User Friendly (Touch Screen Technology)
- Remote Access (Tablet or Smartphone)
- 8 Radial Outputs
- 95 Modules Per Radial (Maximum 760 Units Per Parcel)
- Two Wire Differential Interface
- DHCP, Static IP Addressing & Local Domain Options Available
- Integrates Self-Contained & Slave Luminaires
- 3 Types of Monitoring Sensors; Light Sensor, Voltage Sensor & Bi-Directional Current Sensor

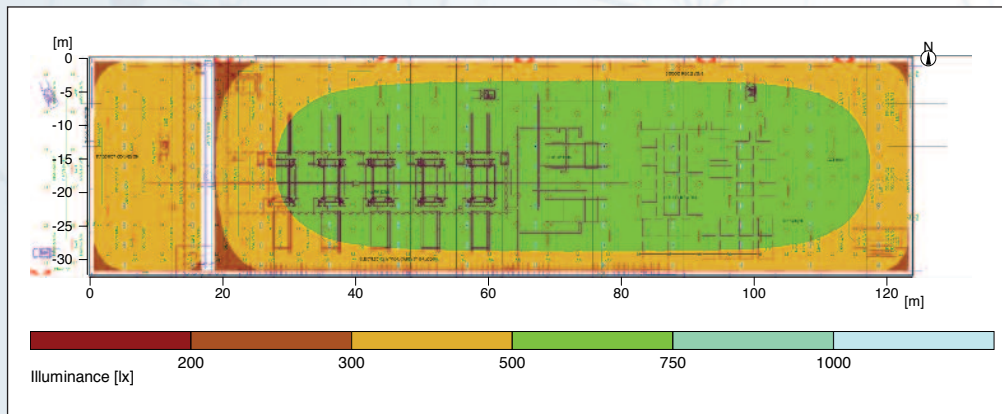

Further specification and pricing details contact **01246 432325** or visit **www.blelighting.co.uk**

# Integrated Energy Efficient Lighting Solution

## A COMPREHENSIVE LIGHTING SERVICE

BLE work with Distribution Partners and End Clients to offer fully integrated energy efficient lighting solutions, with particular expertise in the manufacturing, distribution, retail and leisure sectors. We can provide a total turnkey solution from concept through to design, installation and commissioning of an energy efficient lighting system, including:-

- Detailed lighting survey and review of existing installation or new build designs
- Development of lighting and controls specifications to meet client's objectives
- Detailed lighting system design, including software modelling of lux levels
- Analysis of energy consumption of existing and proposed solutions
- Full financial analysis, including business case justification
- Provision of financing options
- Complete project management, installation and commissioning of solution, or support for client's in house installation team
- An ongoing commitment to work with our clients to optimise their lighting investment

# Making LED Even More Cost Effective & Truly Sustainable

## MAXIMISE ENERGY SAVINGS THROUGH LIGHTING CONTROLS

Official Partner

BLE are an Official Partner of Nedap. Nedap Luxon dynamic light management system enables you to combine lighting control strategies such as time scheduling, daylight harvesting and occupancy sensing, to ensure the right light, at the right time, under all conditions.

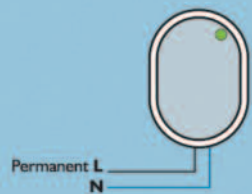

Nedap Luxon enables wireless control of luminaires using a local control unit connected to the internet. It provides online access to the entire lighting system, allowing remote monitoring, adjustments, data reporting and software updates. This ensures ongoing optimal performance that lasts for the life of the system.

Please contact BLE's team of experienced lighting specialists to discuss how we can reduce your operating costs and improve your lighting conditions.

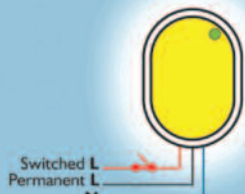

## CHECKLIST FOR EMERGENCY LIGHTING

### NON-MAINTAINED

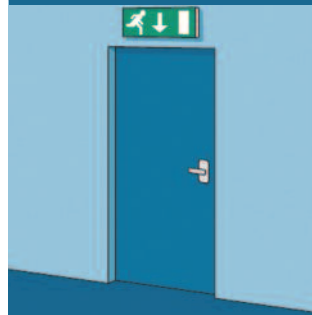

The lighting only operates when the normal mains supply fails (emergency lighting only)

### MAINTAINED

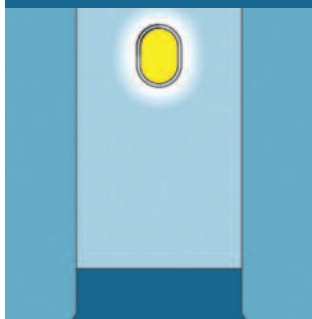

The lighting operates normally and continues to operate when the normal mains supply fails (mains lighting and emergency lighting)

### FINAL EXIT

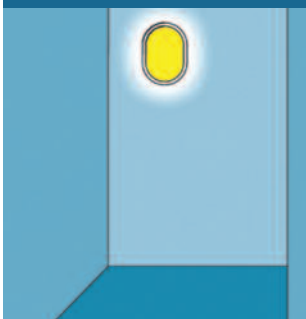

To provide illumination of escape routes

### JUNCTIONS

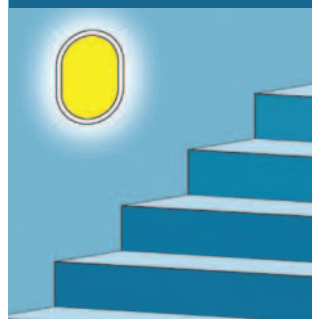

Install within 2 metres of escape route junctions

### CORRIDORS

Install within 2 metres horizontal distance of a change of direction in an escape route

### STAIRWAYS

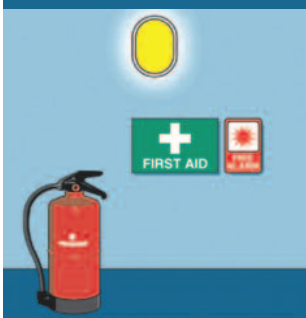

Install within 2 metres horizontal distance of a change in floor level or stairs (each tread to receive direct light)

### FINAL EXITS

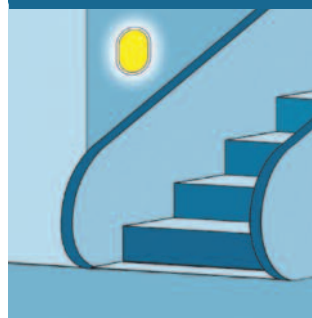

Install externally within 2 metres horizontal distance of any final exits. Please note that sufficient light will be needed to muster a roll call.

### ALARM AREAS

Fire alarms, first aid points and fire-fighting equipment, install within 2 metre horizontal distance

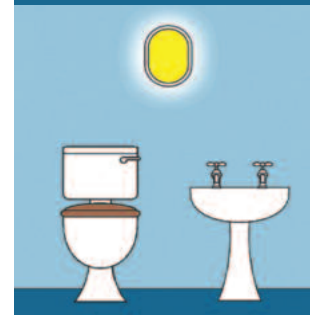

### ESCALATORS

Should not be used as an escape route, but requires the same illumination to protect users on it when the supply fails

## CHECKLIST FOR EMERGENCY LIGHTING cont...

### TOILETS

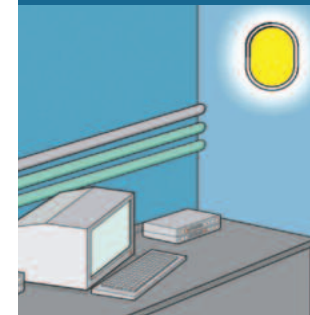

Install in all toilets exceeding 8m² area or where natural light is not present

### LIFTS

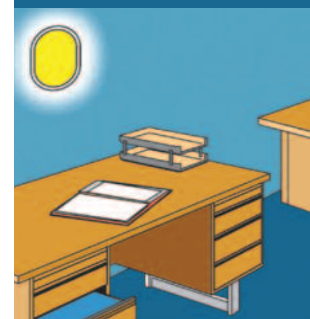

To provide emergency illumination in all lifts

### CONTROL ROOMS

Motor generator, control and plant rooms for essential and safety services

### OPEN AREAS

Open rooms either with a particular hazard, an escape route passing through or larger than 60m²

### HAZARDOUS AREAS

Areas of high risk should be illuminated to 10% of normal lighting or 15 lux, whichever is greater

## LIGHTING REQUIREMENTS

When luminaires have been sited to cover the locations above, additional luminaires may be required to ensure minimum lighting levels are achieved. Spacing tables advise how far to locate the first luminaire, then how far apart other luminaires should be located for a given mounting height. Installation to the spacing's will ensure the lighting levels will be achieved

**ESCAPE ROUTE CORRIDORS ETC:** 1 lux minimum on the centre line of the escape route.

**OPEN AREAS:** 0.5 lux minimum in the central core to

within 0.5m of the walls.

**EXIT SIGNS:** Signs should apply to the European Sign Directive and be either back illuminated or have a emergency luminaire within 2m of horizontal height. Signs should be of the same format throughout the building.

**FURTHER INFORMATION:** For further information on installation design requirements contact BLE Lighting & Power Ltd or visit the ICEL website at [www.ice1.co.uk](http://www.ice1.co.uk)
