design

..... did you know?

..... the Environmental Agency believes schools could reduce their water consumption by up to 50%

washrooms centrally located in a school with clear sight lines will reduce bullying, and subconsciously emphasise to students that a high standard of behaviour is expected in the washroom

# design

..... did you know?

30% of water used in a school is through the taps?

BC 30SCA dolphin wash station

- the dolphin wash station provides a complete hand washing facility at the point of use. an ideal solution where space is at a premium.
- unit automatically dispenses a measured amount of liquid soap. after a time delay allowing the user to lather hands a measured amount of temperature controlled water is dispensed. finally the integral warm air dryer is activated to dry hands.
- available as a surface mounted or recessed version
- all functions are adjustable
- finished in satin stainless steel
- 13a fused spur 220/240v single phase electrical supply (50hz)
- a single 15mm cold water feed (3/4" bsp)
- includes an integral water heater
- ø32mm plastic waste pipe connection
- 3 core 1.5mm cables
- 1 bar minimum water pressure required at a minimum static pressure of 7 bar
- soap level indicator warns of low soap, allowing 75 further shots before the unit is deactivated
- WRAS and CE approved product
- IP21 protection
- two year manufacturer's warranty
- only 109 mm required for recess depth

design

sustainability

..... did you know?

..... the UK has less stored water than any other EU country, with the exception of Belgium and Cyprus

## infra-red taps pay for themselves in two years

7 x infrared taps @ £190	£1130
7 x twist style taps @ £50	£350
difference	£980

50% water saving = 97,500 litres = approx £249 saving per annum\*

cost of energy to heat water is as least as much, usually considerably more, than the cost of the water.

50% water saving	= £249
energy saving	= £249 (minimum)
total saving for 1 year	= £498
total saving for 2 years	= £996

**infrared taps will pay for themselves, and saves the environment in water and energy savings.**

## Velocity hand driers

power consumption	1.6kw
drying time	10.0 seconds
energy per dry	0.004444 kw/hour (1.6kw x 10 seconds/ 60 seconds / 60 minutes = 0.0044 kw/hour)

cost of electricity per kw/hour 0.12

energy cost per dry	£0.00053328
500 dries per day	£0.26664 per day
500 dries x 350 days per year	£93.324 per year

**70% electricity saving with a velocity drier**
