housing

the complete home energy display device

## Ewgeco Live Energy Display Device for New Build Developments and Housing Associations

Worth 2 credits under the Code for Sustainable Homes

Now working with top 4 major UK house builders

## ewgeco live energy display device

Ewgeco is a simple, intuitive and effective energy monitor for the home that helps users control their energy use and cut costs.

Ewgeco displays live energy consumption in your property using an easy to understand, engaging and intuitive 'traffic light' style display that rises and falls in real-time.

With increasing energy bills, householders are seeking ways to reduce costs and Ewgeco can make a real difference.

In an independent study, Ewgeco has been proven to save users 20% on gas and 7% on electricity bills. That is the equivalent of saving at least £245 per year on an average utility bill.

Ewgeco helps users pinpoint power-hungry appliances, set personal targets and take control of energy costs and usage.

Registered Company Number: SC313913.

Registered Office: Ferryburn House, Rosebery Avenue, South Queensferry, Edinburgh EH30 9JG

## worth 2 credits

Ewgeco housing products are accredited under The Code for Sustainable Homes (The Code) which sets a national standard for the sustainable design and construction of new homes. Where the primary source of heating is electricity or gas, Ewgeco is worth 2 credits.

Under the ENE 3: Energy Display Devices section, Ewgeco has been approved by The Code with the aim to promote the specification of equipment to display energy consumption data, thus empowering dwelling occupants to reduce energy use.

## why specify ewgeco

Other Code approved products will also earn house builders 2 credits but the difference with Ewgeco is that we can make a lasting impact for all parties involved.

For instance items like bike sheds in inner-city developments may initially tick the boxes and seem like a quick fix but when building to Level 4, the costs for developers can exceed that of a Ewgeco system. What's more not all residents may use or need a bike shed whereas energy costs affect everybody and a Ewgeco installation can benefit users forever.

## everybody gains with ewgeco

Where Ewgeco is specified everybody benefits:

- **House builders gain:** 2 credits awarded by The Code and provision of a sustainable product that will help their clients
- **Housing Associations gain:** Enhance CSR initiatives and aid the fuel poor
- **Householders gain:** A lasting product that continuously helps users save money on energy bills and reduce wastage.
