

Diamond X-Change module

UNMATCHED FLEXIBILITY.

The innovative Hilti X-Change module (X-CM) allows users to quickly and easily re-tip their core bits on the jobsite - simply push, twist, click and re-tipping is done! A job that used to take hours can now be done in just a few minutes.

All this means greater flexibility on the jobsite, reduced downtime and the ability to get unstuck quickly, resulting in improved productivity.

Technical data	
Specifications	Masonry drilling - LM Specification Concrete drilling - LCS, LCL Specification
Connection end	Hilti BI+ or Hilti BR (R ½ ")
Available lengths	320 and 430 mm
Diameter range	52 - 202 mm

Fast re-tipping

With the new, removable Hilti X-Change module, re-tipping is simpler, faster, and more efficient than ever before - reducing downtime from days to a few minutes.

Remove the ring with a screwdriver - simply push, twist, click and re-tipping is done!

Get unstuck

Removal of stuck cores is easy and effortless - just disengage the ring and slide the core out of the barrel.

All you need in one bag

Say goodbye to bulk and hauling loads of kit onto site.

The Hilti X-Change module's removable ring makes it possible for you to pack one barrel but different rings for different base materials - all in one bag.
