## Site Electrics

We stock a wide variety of 110v items for use on site, including but not limited to - Extension Leads, Outlet Units, PVC Arctic Grade and Rubber H05 / H07 Cable, Heaters & Kettles.

Arctic grade cables can be security printed with company details, telephone number and serial number if required.

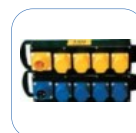

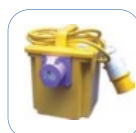

## Transformers

KES manufacture all types of transformers for use in all outdoor and indoor applications, including toroidal, power, lighting, power tool and autowound. We offer a comprehensive range of standard products, or we can provide bespoke solutions to match your precise specification.

## Mains Distribution

Mains Distribution Assemblies (MDAs) from KES have been developed over the years to meet the ever demanding needs of the construction, outdoor event and many other industrial applications for both temporary and permanent installation. It includes mains distribution assemblies for construction sites and industrial applications as well as mains earth leakage protection equipment with fixed or variable sensitivity. Mains Earth Leakage Units (ELUs) provide both earth leakage and overcurrent protection, housed in metal or insulated enclosures with lockable hinged doors. All units are available with fixed and variable sensitivity.

Our extensive manufacturing facilities are equipped with state of the art equipment and CNC machines. In addition to sheet metal works, we also have access to a modern powder coating plant to give products the most durable finish to withstand the harshest of environments, and to allow customers to specify colours to suit their requirements. All products are fully assembled and tested by a team of highly trained and experienced electrical fitters.

We are a leading innovative force in the electrical switchgear industry, with a reputation for delivering flexible and economic solutions to the most challenging of problems, within a timely manor. Working on bespoke projects our design team take your initial concept and compile a comprehensive package tailored to suit your specific requirements.

Quester Road East  
Dartford, Kent  
DA1 1JS

KES was formed in the mid-seventies by Mr Derek Karl and traded as Karl Electrical Supplies from offices in South East London. In the late seventies the company expanded and opened a corner shop in Southampton where it traded for several years until moving to our current location. Further expansion took place in 1994 with the opening of a branch in Yorkshire.
