Engineering Section

Focused on specialist support in resolving any issues in the use of trays and conduit systems in engineered projects.

pemsa has created a series of tools and documents to help installers and engineers to gain optimal technical information and descriptions of the goods **pemsa** can offer for engineering and construction projects.

NEWS

New **reji**band® accessories

Quick installation

Save 80% on installation time

Fast Clip **reji**band®

Easy and quick making of curves with **reji**band®.

Base Support 60 **reji**band®

Suitable for the Installation of **reji**band® 35x60 and 60x60.

Conduit Gland Bracket

- Press fit.
- Hole Sizes:
 - 12mm
 - 16mm
 - 20mm
 - 25mm
 - 29mm
- Allows connection of flexible or rigid conduit.

Approval from some of the toughest tests

The necessary international presence and the technical demands of the sector highlight our leadership position in a market that requires continuous contribution of new solutions, according to standards, certifications and more demanding requirements. Pemsa has thus obtained the following approvals:

AENOR N mark - Trays and supports

rejiband® and **pemsaband®** are the only metal trays on the market that have achieved the N mark of AENOR. This certifies that the N marked **rejiband®** and **pemsaband®** have exceeded the requirements of European standard UNE-EN-61537, "Cable Management - Cable Tray Systems and Cable Ladder Systems" which specifies the security, testing, technical features, etc., which the trays must meet.

N Certificate Rejiband
030/002090

N Certificate Pemsaband
030/002096

N Certificate Supports
030/002089

AENOR N mark - Rigid conduits

Rigid metallic conduits, researched, developed and provided by Pemsa, have been certified by AENOR that they have passed compliance testing requirements and European standards UNE-EN 61386-1:2005 and UNEEN 61386-21:2005, which specifies the safety, testing, technical features, etc., to be met by conduits.

N Certificate Rigid Metal Conduits
030/002199

E90. Fire resistance

rejiband® wire mesh tray has successfully exceeded the fire resistance tests defined by the German Standard DIN 4102-12 "Fire behaviour of building materials and elements, Fire resistance of electric cable systems required to maintain circuit integrity", by withstanding 1000 °C (1832°F) temperature for 90 minutes, thus obtaining the E90 certification.

UL Classified. Electrical Continuity guaranteed

This certification ensures, when using **rejiband®** wire mesh tray, that the correct electrical continuity between trays exists which could, under certain circumstances, be used as a protective earth without using any additional protective conductor. Any protective conductor would connect all earthed points of an installation to the earth conductor, in order to eliminate the risks through indirect contact.

BYCRO finish in compliance with RoHS 2002/95/EC

Pemsa has removed all hexavalent chromium from their production processes, ensuring that their BYCRO **rejiband®** finish complies with all of the latest environmental directives.

Graphic Labels

Allows perfect identification of all elements of the **rejiband®** system.

- Facilitates storage.
- Allows product identification during the entire manufacturing process.
- Includes the following: 13-digit EAN bar code, reference number, the units it contains, type of finish and part dimensions.

Protective packaging

Allows perfect identification of all elements of the **rejiband®** system

- With heat-sealed film and identification label.
- It ensures maximum protection and perfect storage.

CE Marking

All products in this catalogue comply with CE directives.

EAN Code

All products in this catalogue have been assigned their corresponding 13-digit, European bar code (EAN).

rejiband®

Welded rod metal tray, with safety edge, for the carrying of electrical and telecommunications wiring.

Patented safety edge. Avoids damage to cables and injury to the installer.
It is lightweight providing maximum ventilation and cleanliness for the cables.
Provides high strength and flexibility.
Savings in material costs and labour.

Applications:

- Management and distribution of electrical and telecommunications wiring for Civil Works Facilities, Tunnels, Public Buildings, Shopping Centres, Hospitals, Major Infrastructures, Airports, Underground Transport, Railways, etc.
- Industrial facilities sectors. Naval applications, Petrochemical, Textile, Chemical and Food.
- Especially suitable for photovoltaic (PV) systems, Wind, Energy Industry, Renewable Energy.

Corrosion Resistance of the finishes according to BS-EN 61537:

Finish	Meets	Hours resistance	Applications
Bycro	5	450	High protection for indoor installation.
E.G.	3	190	Indoor contaminant-free.
H.D.G.*	7	660	Outside in aggressive or wet conditions. Industrial plants, polluted and coastal areas.
S.S. 304	9C	> 850	Outdoor facilities, the food industry.
S.S. 316 L	9D	> 850	High security facilities, marine, industrial and aggressive indoor installations.

(*) The hot dip galvanized finish is NOT AN ACCURATE AESTHETIC FINISH. It is a very effective corrosion protection. COLOUR DIFFERENCES CAN OCCUR (shades of grey), brightness and surface finish (roughness, smoothness), created during the process employed. This is normal and does NOT AFFECT THE QUALITY AND DURATION OF THE ANTI-CORROSION PROTECTION.

rejiband® false floor

Wire Mesh Tray for managing and supporting underfloor cable installations.

Patented safety edge. Avoids damage to cables and injury to the installer.

It is lightweight providing maximum ventilation and cleanliness for the cables.

Provides high strength and flexibility.

Savings in material costs and labour.

For further information about this product, see pages 6 and 7.

ADVANTAGES OF THE SYSTEM

- Fast and easy installation.
- Easy maintenance and identification of cables.
- Maximum cleaning and ventilation of the cables.
- Ensures a minimum 40mm distance off of the floor when installed with the floor foot.

APPLICATION:

- Management and routing of underfloor electrical and data cables in Public Buildings, Offices, Data Processing Centres, Shopping Centres and Industrial facilities.

Floor Foot

(Reinforced)

- Allows connection of flexible or rigid conduit.

rejiband® Earth Terminal

rejiband® Earth Terminal	
Brass	
Reference	Pack Unit
68000032	20

SUITABLE FOR CABLE SIZES 16-35 MM²

- Facilitates earthing of **rejiband®** trays.
- New design.
- Manufactured in brass.
- More economical. Less weight.

rejiband® Fixing Support

rejiband® Fixing Support	
ABS	
Reference	Pack Unit
68000010	20

SUITABLE FOR VOICE, DATA AND FIBRE OPTIC INSTALLATIONS

- Especially suitable for fixing cable with Rejifix.
- Economical and reusable.
- The supports allow for adjacent installation.
- It requires no bolts or other fastenings for installation.
- Manufactured from a fire retardant plastic material.

megaband[®] Cable Ladder and Accessories

megaband®. Cable ladder for heavy loads and industrial environments

Advantages and features of the range

- 3 metre and 6 metre lengths.
- Widths of 150 to 900 mm and heights of 60, 100 and 120 mm.
- Range available in Light, Medium and Heavy Duty.
- Integrated Click System Couplers giving notable savings in couplers and installation time. (1).
- Safety edge similar to that of **pemsa**®. Maximum safety combined with Pemsa quality. The profile of the tray gives increased strength for greater loadings. (2).
- Alternate reversed rungs as standard. Increases the flexibility for fixing of cables etc.
- The alternate integrated couplers allows for the maintenance and removal of installed sections without the removal of other Megaband lengths. (3).
- Hot Dip Galvanised finish.
- High Load Capacity.
- Wide range of accessories: 90° Bend, Tee, Crossover, Riser etc.

megaband® Cable Ladder

Length 3m.

Integrated Coupler System for depths 60, 85, 100 and 120.
Length of ladder sections 3m.

megaband® Cable Ladder

Length 6m.

Integrated Coupler System for depths 60, 85, 100 and 120.
Length of ladder sections 6m.

Cover

Straight Cover for
megaband® Cable Ladder

Click Fit (no screws or fasteners).
The cover remains fixed even in a vertical position.

(*) The hot dip galvanized finish is NOT AN ACCURATE AESTHETIC FINISH. It is a very effective corrosion protection. COLOUR DIFFERENCES CAN OCCUR (shades of grey), brightness and surface finish (roughness, smoothness), created during the process employed. This is normal and does NOT AFFECT THE QUALITY AND DURATION OF THE ANTI-CORROSION PROTECTION.

Unit of sale: Each.

P.G. Corrosion resistance: Class 2.

H.D.G. Corrosion resistance: Class 7

• Availability whilst stocks last.

(*) The hot dip galvanized finish is NOT AN ACCURATE AESTHETIC FINISH. It is a very effective corrosion protection. COLOUR DIFFERENCES CAN OCCUR (shades of grey), brightness and surface finish (roughness, smoothness), created during the process employed. This is normal and does NOT AFFECT THE QUALITY AND DURATION OF THE ANTI-CORROSION PROTECTION.

Inside Riser Click

pemsaband® accessory to create a 90 degree inside riser

Click System does not require couplers. Only two nuts and bolts per joint, for correct connection. Accessory + cover = IP44

Inside Riser Cover Click

Cover for inside Riser Click accessoryk

Click cover does not require fixings. Accessory + cover = IP44

Outside Riser Click

pemsaband® accessory to create a 90 degree outside riser

Click System does not require couplers. Only two nuts and bolts per joint, for correct connection. Accessory + cover = IP44

Outside Riser Cover Click

Cover for outside Riser Click accessory Click

Click cover does not require fixings. Accessory + cover = IP44

Metal tray system Fire Resistance

Objective

To contribute to the security of the facilities in case of fire, ensuring the maintenance of its integrity and functionality.

Application

Facilities in Public premises, office buildings, transport infrastructure, tunnels, etc.

Practically, contributes to the functioning of ventilation equipment, fire, and evacuation signage.

Establishes the following requirements to set up a fire-resistant installation approval as **E90**, to maintain the functioning and integrity of the electrical installation. These requirements are contained in the standard DIN 4102-12.

(See pages 64 and 65 for the description of the test).

Trays **reji band**® / **pemsaband**® widths from 100 to 400, depth 60 mm.

Distance of **RPLUS** supports / **omega SPLUS** is 1200 mm for ceiling or wall.

Using threaded rod connectors, **E90 SPLUS** (ref. 62035001) and **E90 RPLUS** (Ref. 62036001), as the support used for fixing the roof or wall system. (See charts, page 61).

Maximum loading of the cables 10 kg / m. (for each tray height).

You can install two lines of tray, depending on the needs of the installation.

The minimum separation distance between the two heights of trays should be 300 mm.

Other considerations

To ensure the correct functioning of the system requires the use of cables with an equivalent fire-resistance rating. Pemsas has conducted its tests on cables:

FE180/E90 NHxH Dätwyler PYROFIL KERAM
NEXANS type FB type RHEYHALON N2Hx-0 / JE-90

To anchor the assemblies to different surfaces a system with suitable properties and characteristics of fire resistance must be used.

For more technical information please request a copy of the E90 Fire Resistance dossier from the Pemsas Engineering Department.
info@pemsas.co.uk

View the possible **E90** Mounts for Wall
and Ceiling on pages 60 to 63

E90 RPLUS and E90 SPLUS Connectors for specific installations **E90**

Specially designed to provide an installation of trays complying with the requirements of DIN 4101-12.

Their function is to connect the threaded rods to the Reinforced RPLUS and Omega SPLUS brackets.

Identification plates are supplied with these connectors to indicate that the assembly meets the E90 fire resistance criteria.

FIRE RESISTANT tray system ASSEMBLIES mounted on the WALL

Wall mounting **rejiband® E90** with Omega brackets

rejiband®

- + Omega **SPLUS** Brackets
- + **E90 SPLUS** Connector

E90 Installation Requirements:

- 1.2m distance between supports.
- Valid for Omega SPLUS and RPLUS Supports.
- Use RPLUS or SPLUS connectors to connect the rod.
- Maximum weight of cables:
10 kg / m. for the height of tray.
- Depending on the needs of the installation two tray lines can be used.
- Minimum distance between trays:
300 mm.

Necessary Materials:

rejiband® E90 Wall mounting brackets to channel with an angled threaded rod

rejiband®

- + **RPLUS** Supports
- + **RPLUS** E90 Connector
- + Threaded Rod

E90 Installation Requirements:

- 1.2m distance between supports.
- Valid for Omega SPLUS and RPLUS Supports.
- Use E90 SPLUS connectors for connecting the rod to the E90 SPLUS or RPLUS Support.
- This method is appropriate when the distance to secure the rod to the roof is very large making the preferred option to brace the rod to the wall.
- Maximum weight of cables: 10 kg / m

rejiband® E90 ceiling mounting with Heavy duty pendant drop and RPLUS Supports

rejiband®

- + **RPLUS** Supports
- + **E90 RPLUS** Connector

E90 Installation Requirements:

- 1.2m distance between supports.
- Valid for Omega SPLUS and RPLUS Supports.
- Use E90 SPLUS Use E90 connectors for connecting the rod to the E90 SPLUS or RPLUS Support.
- This method is appropriate when the distance to secure the rod to the roof is very large making the preferred option to brace the rod to the ceiling
- Maximum weight of cables: 10 kg / m.

Valid for any size of RPLUS Omega support.

The choice of using M8 or M10 threaded rod and nuts depends on the loadings and support distances within the installation.

NOTES:

- Products, for this E90 solution, are also available in S.S. 304 and S.S. 316 finish. For more detailed information please consult with the Pensa Engineering Department.
- This solution can also be used with Reinforced Omega SPLUS Supports (See page 48).

pemsaband® OPTION:

- This installation is available for **pemsaband® SX** Tray. For more information please consult the Pensa Engineering Department.

U. M. E90: E90 Mounting Unit. U. 2 M. E90: E90 Mounting Unit with 2 heights.

(*) The hot dip galvanized finish is NOT AN ACCURATE AESTHETIC FINISH. It is a very effective corrosion protection. COLOUR DIFFERENCES CAN OCCUR (shades of grey), brightness and surface finish (roughness, smoothness), created during the process employed. This is normal and does NOT AFFECT THE QUALITY AND DURATION OF THE ANTI-CORROSION PROTECTION.

Fire Resistance

Safety is a growing concern within electrical installations.

In the event of a fire the behaviour of electrical equipment, when exposed to high temperatures, determines whether the installation achieves a certain safety level. **rejiband®** wire mesh cable tray complies with these requirements with a number of features and properties as described in the **E90** Certification.

rejiband® E90
fire resistance

rejiband® wire mesh cable tray is manufactured in accordance with the requirements and tests of the product standard **IEC 61537** "Cable Tray and Cable Ladder Systems."

So far this standard has not yet covered the fire risks and fire resistance.

DIN 4102-12 "Cable Tray and Cable Ladder Systems"

LOWER FIRE
RESISTANCE

E30

E60

E90
fire resistance

GREATER FIRE
RESISTANCE

When studying the properties of **rejiband®** wire mesh cable tray against fire, **pemsa** has used the German Standard DIN 4102-12 which is the main reference in other European countries.

This standard tests the complete installations, in order to evaluate the structural integrity of the assembly and how the components react when exposed to fire.

A 3m length of wire mesh tray, accessories and power cables are the subject of the test. According to the final results, the certification may be issued at three different levels:

Table Standards.

STANDARDS	E30	E60	E90
Time	30 min.	60 min.	90 min.
Temperature	840 °C	950 °C	1000 °C

The purpose of this test is to validate the correct operation of the electrical system and to ensure that critical services (fire suppression system, emergency lighting, ventilation and other basic installations) remain functional for long enough to organise evacuation in the event of fire.

rejiband® E90

fire resistance

Test Set-up

The test set-up consisted of a 3 m length of wire mesh tray, including joints and accessories, supported on brackets at intervals of 1.2 m. The power cables, up to 1 kV, should be fire resistant at the same or higher level than halogen free, high safety cables. The wire mesh tray was then loaded with chains to simulate the cable weight and other standard conditions of the test.

During the test, a standardised temperature vs. time curve is imposed in the test oven, obtaining the 3 levels of certification and their corresponding times and temperatures as shown on table 1.

The results prove that the cables maintain electrical continuity during the test, and therefore the operational integrity of the installation is maintained.

As the test was progressing, both cables and trays were damaged by the high temperatures as defined in DIN 4102-12. Trays are deformed but maintain their support function. The cable sheathing starts to burn causing risk to the correct functioning of the system.

As shown in figure 3, **rejiband®** wire mesh cable tray and its accessories neither collapsed nor were they detached from the supports, ensuring enough structural resistance within the system.

The wire mesh cable tray exceeded the fire resistance test, qualifying for the highest level of resistance proposed by this standard, the **E90**. The tray with cables were tested for **90 minutes** at temperatures of **1,000°C** (in accordance with the conditions of DIN 4102-12), maintaining circuit integrity against fire.

Figure 1. General View Of The Assembly

Conclusions

The combined use of **rejiband®** wire mesh tray with high safety halogen-free electrical cables improves substantially the safety of the installation. Since both components provide a self extinguishing system, which does not produce toxic, corrosive or opaque fumes (more typical for polymeric & halogen materials), this allows a period of time long enough for evacuation and emergency works.

Investing in safety equipment and systems with high fire resistance must be accompanied by a safe installation that ensures their correct functioning in the most critical situations.

Figure 2. Assembly Before Test

Figure 3. Assembly After Test

Pemsa Metal Tray Systems: Behaviour in the event of fire: A1 (the Safest: Non Combustible)

New European Classification System in compliance with the Directive 89/106/EC,
according to the Fire Behaviour of the Materials:

		CLASSIFICATION (*)		ADDITIONAL CLASSIFICATION
1	The safest	A1 ✓	Non combustible ✓	-
2		A2	Slightly combustible	Smoke Production (S) Smoke Density Flaming droplets/particles (D)
3		B	"	
4		C	Combustible	
5		D	"	
6		E	"	
7		F	No performance determined	-

(*) In accordance with EN 13501-1:2002

Behaviour in the event of fire

Materials	Directive 89/106/EC	Smoke Emissions	Smoke Opacity	Smoke Toxicity	Contained Halogens
Steel Trays ✓	A1, NON COMBUSTIBLE ✓	No Smoke ✓	No Smoke ✓	No Smoke ✓	NO ✓
Halogen-free cables	COMBUSTIBLE / FIRE RESISTANT	Reduced Smoke Emission	Reduced Opacity of Smoke	Smoke with Low Toxic Particles Level	NO
P.V.C.	COMBUSTIBLE / FLAME PROPAGATOR	Dangerous Smoke Emission	High Opacity of Smoke	Smoke with Toxic Particles Level	YES

The **rejiband®** and **pemsaband®** Metal Tray (A1) systems guarantee safety in that they do NOT emit toxic gases or halogens, they do NOT emit opaque smoke (luminous transmittance), they do NOT emit corrosive gases and they do NOT propagate fire.

Maximum service temperatures of cables and trays (*)

Conventional PVC Cables	70°C
Halogen-free Cables	90°C ✓
PVC Trays	60°C
rejiband® and pemsaband® Metal Trays	150°C ✓

(*) For cables and trays, data according to manufacturer catalogues.

rejiband® and **pemsaband®** Metal Trays do not limit the maximum service temperature of halogen-free cables.

rejiband® and **pemsaband®** metal trays comply with the standard UNE-EN-61 537
"Cable Tray and Cable Ladder Systems for cable management" (REBT ITC-BT-28 "public places")

Surface treatment to prevent corrosion

All the steel products made by Pemsa are protected by one of the following coatings:

P.G.	SENDZIMIR GALVANISING
	UNE-EN 10346

(NOT TO BE CONFUSED WITH HOT-DIP GALVANIZING).

Used solely for protecting sheet metal of below 3 mm in thickness.

Produced by dipping the rolls of steel in a zinc bath at 450 °C.

This technique is widely used in the manufacture of barcut parts and stamped parts. The cuts arising in the machining are partially regenerated by the galvanic pair formed by the steel and the zinc.

The thickness of the protecting coating is from 8 to 15 microns.

Recommended for indoor installations in a dry atmosphere with no aggressive contaminants.

E.G.	ELECTROGALVANIZING
	UNE-EN ISO 2081 (White colour)

This involves protecting parts made of iron and steel electrolytically using zinc.

The thickness of the coating applied varies from 8 to 12 microns - see table II. The Standard recommends applying a chrome-conversion layer (UNE 112-050).

Recommended for indoor installations in a dry atmosphere with no aggressive contaminants.

BYCRO/E.B.	ELECTROGALVANIZED BICHROMATE
	UNE-EN ISO 2081 (Yellow colour)

This involves the above process plus subsequent treatment that improves the anti-corrosion performance - see table II.

The thickness of the coat applied is 8-12 microns.

The process as used by Pemsa involves no CYANIDE and no CHROME VI. Recommended for use in dry, contaminant-free atmospheres. Better performance than P.G. and E.G.

H.D.G.	HOT-DIP GALVANISING
	UNE-EN-ISO 1461

Used for all kinds of products. It involves immersing the individual pieces to be protected into a bath full of zinc at 450 °C after the parts have been machined. The average thickness of the protective coating is 70 microns.

Recommended for outdoor, marine, rural, industrial and aggressive indoor installations.

STAINLESS STEELS

These are carbon steels alloyed with chromium, nickel, magnesium and molybdenum. The best-known ones are AISI 304 (18/8) and AISI 316.

Contrary to widespread belief, these steels ALSO SUFFER CORROSION, though their performance when properly handled is generally much better than any type of protective coating.

Their specific behaviour is the result of the chromium and nickel spontaneously generating a film of chromium oxide in the presence of an oxidising environment, this film then preventing subsequent oxidation. The film is very delicate, and can be broken by blows, machining, welding etc.

Stainless steels are easily CONTAMINATED, thus losing their properties, when they are machined with tools that use other types of steel. In such cases, the protective film must be generated by a chemical-attack process.

To solve this problem, after the manufacturing work (punching, welding), PEMSA subjects all its **rejiband®** S.S. rack and accessories to a special process for regenerating the protective layer known as THERMICRON.

A 304	STAINLESS STEEL AISI-304
-------	--------------------------

Suitable for:

- Fresh water • Industrial atmosphere • Marine atmosphere
- Normal chemical industry • Food industry (except high temperatures).

A 316	STAINLESS STEEL AISI-316
-------	--------------------------

Specially recommended for:

- Marine and coastal areas • Aggressive chemical environments
- High temperature food industry applications.

Laboratory tests carried out in a salt-spray chamber in accordance with ASTM-B117 produced the following results:

Table I

Corrosion resistance in hours		
BYCRO	Electrolytic zinc coating, bichromate (yellow)	450
E.G.	Electrolytic zinc coating (white)	190

Recommendations for the correct installation of cable trays

(BS-EN 61537, BS 20.460, REBT 2002, ITC-BT 20 and 21) Standards

1. LOCATION

Must NOT be installed under water, steam, gas, tubing, etc.

2. PROTECTION

The trays are for conveying cables, NOT FOR PROTECTING THEM. In the majority of installations, the characteristics of current cables makes it unnecessary to protect them. If necessary, use the appropriate covers.

3. VENTILATION

Cables heat up while being used due to the passage of current. At the same ambient temperature and power, this heating can increase according to the type of tray being used (open or closed). With less ventilation, a greater cable cross section is required and, as a result, cost increases:

Maximum ventilation: **rejiband®** or ladder-type trays.
Medium ventilation: Perforated metal sheet trays.
Medium ventilation: Solid metal sheet.

The use of solid bottom trays is, in most cases, due to aesthetic criteria.

3.1. Distance between trays

For correct cable ventilation, at least the minimum distance indicated in the drawing must be maintained.

3.2. Distance to walls

When trays are fastened to a wall on supports, a separation of at least 20 mm must be maintained between the tray and the wall in order to allow for cable ventilation.

At pemsa, all wall supports have a total length of 50 mm more than the width of the tray to be installed, thereby, **complying with legislation in force**.

Example: A 300 support has a length of 350 mm..

4. MARKINGS

Trays should facilitate labelling through markings.

5. SUPPORTS

These are fundamental in a tray installation. If they are not suitable, the whole installation will be flawed. The following factors should be borne in mind when choosing them:

- The load-bearing capacity of the support.
- Its corrosion resistance.
- Ease of installation.

The recommended distance between supports or bearing points is normally 1500 mm. When this distance is changed, the performance of the tray changes.

When attaching the supports to the wall or ceiling, particular attention must be paid to the fixings used, making sure it is right for the characteristics of the building.

The use of CHANNEL gives better load distribution, whilst also facilitating adjustment.

6. RECOMMENDED POSITIONS FOR SUPPORTS

(Same for **rejiband**® steel wire cable trays)

7. TRAY AND SUPPORT DEFORMATION

The weight of cables deforms trays, the most visible point being in the centre between supports.

The allowable value (F) of deformation is purely aesthetic, always taking care not to exceed the values indicated by the manufacturer, which, in accordance with international standard BS-EN 61537, should be as follows:

On supports, maximum F deformation and twisting occurs at the ends.

The standard requires that the maximum $F = L/20$ mm.

The deformation, F is called deflection, and is expressed in mm.

8. CONNECTORS

The trays are shipped in pre packed lengths of 2 or 3 metres. The pieces called CONNECTORS are used for connecting them. For mechanical purposes, the weakest points in a tray installation are the joints. Only the use of the right number of CONNECTORS in the right positions as recommended by the manufacturer can ensure that the entire system will perform satisfactorily.

The ideal spot for employing the CONNECTOR is at $L/5$ from the nearest support.

Fitting the CONNECTORS between $L/4$ and $L/5$ is the most advisable approach.

The CONNECTORS should NOT be fitted at point $L/2$ (halfway between the supports), or on the supports.

When $L=1.5$ metres, which is the commonest case, the use of 3-metre lengths ensures the best placing of the joints, unlike using 2-metre lengths.

9. LOAD-BEARING CAPACITY

This is the load (uniformly distributed, NOT concentrated) that a tray can safely cope with.

It is expressed in kilos or kg per running metre, in the form of graph curves or tables.

$$1 \text{ kg} = 9.81 \text{ Newtons}$$

The values are obtained through experiments carried out in accordance with the pertinent standards.

ALL THE LOAD AND PERFORMANCE VALUES GIVEN IN THIS CATALOGUE WERE OBTAINED FROM TESTS CARRIED OUT IN ACCORDANCE WITH INTERNATIONAL EN 61537 STANDARD.

It is often found that similar trays from different manufacturers give different values. This may be due to the load tests not being carried out in accordance with this standard.

For proper comparisons to be made between two similar trays from different manufacturers, check that the values given were found under equivalent test conditions.

10. EARTHING (ELECTRICAL CONTINUITY)

All metal tray systems must have proper electrical continuity. However, to ensure safety, it is advisable to make an earth connection using a suitable conductor for each part of the system.

This CANNOT be done on painted or epoxy-coated trays without removing the protective layer at that point and at the join-points between the various lengths, which will inevitably lead to oxidation WITHOUT ENSURING safety.

11. THROUGH-WALL MOUNTING

When the trays have to go through a wall, the trays should have a clear space of approximately 100 mm on each side. **The earth connection must always be maintained.**

If the characteristics of the two rooms separated by the wall are different and may pose risks associated with moisture, gas or fire, the hole in the wall should be blocked off using suitable systems from among those available.

The designs, products and technical information contained in this document are protected by intellectual property rights and include the following utility models: 1045098, 1049231, 1049533, 1050990, 1052626, 1052946, 1058557, 1057771, 1057624, 1060615, 1066293, 1061789, 1066293, 1069071, 1069184, 1069695, 1069986, 1070765, 1070555.

PemsaFlex System

Flexible Conduit System Conduits, Connectors and accessories

PemsaFlex has a wide range of conduits, connectors and accessories, manufactured in polyamide and other engineering plastics that provide different solutions in industrial environments.

PemsaFlex is characterized by a wide range of connectors and accessories that perfectly complement the protection of the wiring installation. Angle connectors 45° and 90°, plastic and metallic threads and other special fittings increase the range available.

These connectors and accessories use the Click System that allows fast and easy assembly, providing excellent levels of protection.

PemsaFlex Conduit System is installed in many high level environments and applications. Railway industries, Robotics applications, Electrical installations for equipment on board ships, buildings and Contractor applications.

These Conduit systems are manufactured and tested under the features detailed within IEC61386 standards under the CE marking according to the European directive on low voltage.

Pemsa manufactures under the ISO 9001 quality standard, ensuring they provide a high level of technical excellence whilst making their products highly competitive.

Advantages

- Wide range of types and sizes.
- Excellent properties and flexibility.
- Quick and easy installation.
- Excellent Cable protection, liquid and solid tight.
- High resistance to UV Radiation. Recommended for outside applications.

(*) The hot dip galvanized finish is NOT AN ACCURATE AESTHETIC FINISH. It is a very effective corrosion protection. COLOUR DIFFERENCES CAN OCCUR (shades of grey), brightness and surface finish (roughness, smoothness), created during the process employed. This is normal and does NOT AFFECT THE QUALITY AND DURATION OF THE ANTI-CORROSION PROTECTION.

Terms and Conditions

1 Interpretation

- 1.1 In these Conditions, unless the context otherwise requires:
 - 1.1.1 "the Company" means Pemsa UK Limited of Unit 2, Hunslet Trading Estate, Severn Road, Leeds, LS10 1BL;
 - 1.1.2 "the Customer" means the person, firm or corporation with whom the Company contracts for the sale of the Goods upon these Conditions;
 - 1.1.3 "the Goods" means the goods (including any instalments of the goods or any part of them) which the Company is to manufacture and supply to the Customer in accordance with the Contract;
 - 1.1.4 "the Contract" means the contract for the sale and purchase of the Goods by the Customer;
 - 1.1.5 "Business day" means any day other than Saturday, Sunday or a bank or public holiday.

2 Limitation of Contract

- 2.1 All orders accepted by the Company shall be based upon these Conditions which shall override and take the place of any other terms or conditions produced or referred to by the Customer.
- 2.2 If the Customer places an order with which the Company wishes to proceed, an order confirmation (the "Confirmation") will be sent to the Customer containing details of the order. The Confirmation in conjunction with these Conditions shall form the basis of the contract between the Company and the Customer. In the event of any conflict or inconsistency between these Conditions and the terms of the Confirmation, the terms of the Confirmation shall prevail. No variations shall be binding unless agreed in writing between authorised representatives of the Company and the Customer.
- 2.3 All representations, whether written or oral, made prior to the acceptance of the Customer's order by the Company are expressly excluded from the Contract, unless otherwise agreed in writing by both parties.
- 2.4 No variation of or addition to these Conditions shall be binding unless agreed in writing between an authorised representative of the Company and the Customer, and no order placed may be cancelled, deferred or varied without the written agreement of an authorised representative of the Company.

3 Prices

- 3.1 All prices quoted, price lists or estimates (whether written or oral) issued by the Company from time to time shall not bind the Company and the price charged may be adjusted to take account of any fluctuations in VAT, government duties or in the cost of manufacture unless the price was stated to be fixed and the Customer has complied in all respects with the terms and conditions specified by the Company subject to which the price was stated to be fixed.
- 3.2 Where Goods are to be delivered to a destination outside the United Kingdom, prices unless expressly stated to be otherwise, are ex-works.
- 3.3 All prices quoted are exclusive of VAT and will be subject to VAT at the rate in force at the time.

4 Cancellation

- 4.1 The Customer may cancel an order once accepted, however, cancellation of the order by the Customer for whatever reason shall entitle the Company to recover for any loss of profit and all costs, charges and expenses incurred by the Company in respect of the order up to the date of receipt by the Company of written notification of cancellation from the Customer.

5 Acceptance

- 5.1 The Company routinely inspects any Goods supplied to the Customer. If the Customer requests any bespoke or specialist testing the additional costs or expenses if any, incurred by the Company shall be charged to the Customer in addition to the price.
- 5.2 In the event that the Customer requires the testing to be carried out in its presence or before a representative then the Customer shall attend at the Company's premises upon the Company giving notice of availability of the Goods for testing within 7 days of the date of the notice. If the Customer does not attend or if within 14 days of the Customer having attended the Customer does not notify the Company that the Goods do not accord with the Contract specifying reasons, then the Customer shall be deemed to have accepted that the Goods are in accordance with the Contract and shall not be entitled to reject them or to claim damages or compensation from the Company on the grounds of anything which the testing revealed or would have revealed if it had been carried out.
- 5.3 Irrespective of the above, the Customer shall inspect the Goods immediately upon their arrival at the delivery destination in order to ascertain:
 - 5.3.1 that the number of items and packages and the quantities are as specified and the Goods are as described in the Company's delivery note;
 - 5.3.2 whether the Goods have been damaged in transit;
 - 5.3.3 that the Goods are those specified in the Customer's order stated on the Company's Delivery Note. Any discrepancy between the Goods delivered and those described in the Company's delivery note and any damage to the Goods in transit must be notified to the Company in writing within three Business Days of receipt of the Goods. In the case of Goods damaged in transit, the Customer shall retain the damaged Goods for a period of one month from the date of receipt by the Customer during which period the Customer will permit the Company and its representatives to examine the Goods and any damage to them incurred in transit. In the case of non-delivery of the Goods the Customer must notify the Company in writing within 10 Business Days of the receipt by the Customer of the Company's delivery note.
- 5.4 The Customer shall be deemed to have accepted the Goods as being in accordance with the Contract unless within 10 Business Days of receipt of the Goods the Customer notifies the Company in writing of any defect in materials or workmanship or failure to comply with designs, drawings, specifications or other data supplied by the Customer or any other failure of the Goods to conform with the Contract which would be apparent upon such inspection and testing as it is reasonable for the Customer to undertake within such 10 Business Days.
- 5.5 Where the Goods are not manufactured by the Company, are delivered direct to the Customer by, or collected by the Customer from the manufacturer, the Company shall not be liable for any loss or damage to the Goods whatsoever and whensoever occurring.

6 Payment

- 6.1 The price for the Goods including any charges for packaging, freight, insurance or any other charge whatsoever must be paid upon presentation of a pro-forma invoice and

in any event prior to delivery. The Company reserves the right to refuse delivery if the price has not been so paid and shall not be liable for any loss caused to the Customer.

- 6.2 Where the Customer has been offered a credit account with the Company, unless otherwise agreed, payment for the Goods shall be made not later than the last day of the month following the month in which the Goods were despatched from the Company's premises. The time stipulated for payment shall be of the essence and failure to pay within the period specified shall entitle the company on the expiration of 14 days notice in writing to the Customer to suspend further performance of the Contract pending payment and in addition the Company shall be entitled without liability wholly or partly to cancel the Contract or any other contract between the Company and the Customer without prejudice to any other remedy available to the Company.
- 6.3 Where Goods are delivered by instalments, the Customer shall pay for each instalment in accordance with the terms of this Condition.
- 6.4 The Company shall be entitled to interest (as well before as after any judgment) any part of the Contract price not paid by its due date from that date until actual payment at the rate of 4% per annum above HSBC Bank plc's base lending rate prevailing from time to time during such period.
- 6.5 Unless otherwise agreed in writing the Customer shall not be entitled to set off against any monies due to the Company under the Contract, any amount claimed by or due to the Customer from the Company whether pursuant to the Contract or on any other account whatsoever.
- 6.6 Unless otherwise agreed in writing, all accounts shall be paid at the Company's registered office. Cheques and money orders shall be made payable to or to the order of the Company. Only the company's official receipt will be treated as valid.

7 Property and Title to the Goods

- 7.1 The Goods shall be at the risk of the Customer from the time at which they are loaded on the vehicle on which they are to be delivered to the Customer whether such vehicle is the Customer's own vehicle or a third party's vehicle.
- 7.2 Notwithstanding section 7.1 the legal and beneficial ownership of the Goods shall remain with the Company until such time as the Customer shall have paid to the Company in cash or cleared funds payment in full of the price of the Goods and all other goods agreed to be sold by the Company to the Customer for which payment is due.
- 7.3 Until the title to and property in the Goods pass to the Customer the following provisions shall apply:
 - 7.3.1 The Customer shall hold the Goods solely as fiduciary agent and bailee for the Company and shall keep them separate from the Customer's own Goods or those of any third party and in a manner which makes them readily identifiable as the Goods of the Company.
 - 7.3.2 The Goods shall be properly stored, protected and insured and the Company shall be entitled to examine them in storage at any time during normal business hours and upon giving the Customer reasonable notice of its intention to do so and to enter upon any premises owned or occupied or access to which is controlled by the Customer for that purpose;
 - 7.3.3 The Company may at any time without prior notice to the Customer (and provided the Goods are still in existence and have not been resold) repossess and resell the Goods if any of the events specified in section 13 occurs or if any sum due from the Customer to the Company under the Contract or on any other account or pursuant to any other contract is not paid on the due date for payment. For the purpose of exercising its rights under this subparagraph 7.3.3 the Company, its employees or agents together with any vehicles considered by the Company to be necessary shall be entitled at any time without prior notice to the Customer to free and unrestricted entry upon and access to the Customer's premises and/or other locations where any of the Goods are situated.
- 7.4 Notwithstanding section 7.2 above the Customer may as principal in the ordinary course of business sell the Goods by bona fide sale at full market value; in which case:
 - 7.4.1 the Goods shall be deemed sold or used in the order delivered to the Customer.
 - 7.4.2 any resale by the Customer of the Goods in which property has not passed to the Customer shall (as between the Company and the Customer only) be treated as if made by the Customer as agent for the Company;
 - 7.4.3 the proceeds of sale of any Goods shall be held by the Customer in trust for the Company to the extent of all sums recoverable by the Company under section 7.2 above;
 - 7.4.4 the Customer shall keep any proceeds of sale as referred to in section 7.4.3 in a separate account and not mingled with other monies or paid into any overdrawn account and shall at all times be identifiable as the Company's money. In any event the Company shall have the right to trace such proceeds.
- 7.5 The Company may at any time appropriate to such indebtedness as it thinks fit sums received from the Customer notwithstanding any purported appropriation or designation by the Customer;
- 7.6 The rights and remedies conferred upon the Company by this section 7 are in addition to shall not in anyway prejudice, limit or restrict any other rights or remedies of the Company under the Contract.

8 Delivery

- 8.1 Any date or time given by the Company to the Customer for the delivery of the Goods is approximate only and it is not of the essence of the Contract and such failure shall not constitute a breach of contract by the Company entitling the Customer to terminate the Contract and/or to claim damages against the Company and the Company shall be entitled to an extension of the time fixed for delivery which is reasonable in all the circumstances.
- 8.2 The Company may deliver the Product in advance of the quoted delivery date on giving reasonable notice to the Customer.
- 8.3 Where the company is to make separate deliveries under a single order or where deliveries are to be made in instalments then failure to comply with any delivery date shall not be deemed to be a repudiation of the balance of the contract.
- 8.4 If the Company agrees that the Customer may collect the Goods, the Customer shall collect them within 3 days of being notified that they are ready for collection failing which the Company may despatch the Goods at the Customer's risk and expense or store them in which case the Customer shall pay the Company's reasonable storage charges and the Goods shall be stored at the Customer's risk. If the Customer requests the Company to

delay despatch of the Goods and the Company agrees to do so the Customer shall pay the Company's reasonable storage charges and the Goods shall be stored at the Customer's risk as from the date upon which the Goods are ready for despatch.

- 8.5 If the Company arrives at the Customer's desired delivery site on the delivery date and on attending the site is unable to affect delivery of the Product due to the Customer being unprepared or absent, or if the Customer fails to give the Company adequate delivery instructions at the time stated for delivery then, without limiting any other right or remedy available to the Company, the Company may store the Product until actual delivery and charge the Customer for the reasonable costs (including insurance) of storage and re-delivery.

9 Warranty and Liability

Subject to the following provisions the Company warrants that the Goods will correspond with their specification at the time of delivery and will be free from defects in material and workmanship.

- 9.1 The above warranty is given by the Company subject to the following conditions:
- 9.1.1 the Company shall be under no liability in respect of any defect in the Goods arising from any drawing, design or specification supplied by the Customer;
- 9.1.2 the Company shall be under no liability in respect of any defect arising from fair wear and tear, wilful damage, negligence, abnormal working conditions, failure to follow the Company's instructions (whether oral or in Writing), misuse or alteration or repair of the Goods without the Company's approval;
- 9.1.3 the Company shall be under no liability under the above warranty (or any other warranty, condition or guarantee) if the total price for the Goods has not been paid by the due date for payment;
- 9.1.4 the above warranty does not extend to parts, materials or equipment not manufactured by the Company, in respect of which the Customer shall only be entitled to the benefit of any such warranty or guarantee as is given by the manufacturer to the Company.
- 9.2 Subject as expressly provided in these Conditions, and except where the Goods are sold to a person dealing as a consumer (within the meaning of the Unfair Contract Terms Act 1977), all warranties, conditions or other terms implied by statute or common law are excluded to the fullest extent permitted by law.
- 9.3 Where the Goods are sold under a consumer transaction (as defined by the Consumer Transactions (Restrictions on Statements) Order 1976) the statutory rights of the Customer are not affected by these Terms.
- 9.4 Subject to section 6, a claim by the Customer which is based on any defect in the quality or condition of the Goods or their failure to correspond with specification shall (whether or not delivery is refused by the Customer) be notified to the Company within seven days from the date of delivery or (where the defect or failure was not apparent on reasonable inspection) within a reasonable time after discovery of the defect or failure. If delivery is not refused, and the Customer does not notify the Company accordingly, the Customer shall not be entitled to reject the Goods and the Company shall have no liability for such defect or failure, and the Customer shall be bound to pay the price as if the Goods had been delivered in accordance with the Contract.
- 9.5 Where a valid claim in respect of any of the Goods which is based on a defect in the quality or condition of the Goods or their failure to meet specification is notified to the Company in accordance with these Terms, the Company may replace the Goods (or the part in question) free of charge or, at the Company's sole discretion, refund to the Customer the price of the Goods (or a proportionate part of the price), in which case the Company shall have no further liability to the Customer.
- 9.6 Except in respect of death or personal injury caused by the Company's negligence, or liability for defective products under the Consumer Protection Act 1987, the Company shall not be liable to the Customer by reason of any representation (unless fraudulent), or any implied warranty, condition or other term, or any duty at common law, or under the express terms of the Contract, for loss of profit or for any indirect, special or consequential loss or damage, costs, expenses or other claims for compensation whatsoever (whether caused by the negligence of the Company, its employees or agents or otherwise) which arise out of or in connection with the supply of the Goods (including any delay in supplying or any failure to supply the Goods in accordance with the Contract or at all) or their use or resale by the Customer, and the entire liability of the Company under or in connection with the Contract shall not exceed the price of the Goods, except as expressly provided in these Terms.

10 Force Majeure

- 10.1 The Company shall not be liable or be deemed to be in breach of these Conditions by reason of any delay in performing, or any failure to perform, any of the Company's obligations in relation to the Goods, if the delay or failure was due to any cause beyond the Company's reasonable control. Without limiting the foregoing, the following shall be regarded as causes beyond the Company's reasonable control:
- 10.1.1 Act of God, explosion, flood, tempest, fire or accident;
- 10.1.2 war or threat of war, sabotage, insurrection, civil disturbance or requisition;
- 10.1.3 acts, restrictions, regulations, bye-laws, prohibitions or measures of any kind on the part of any governmental, parliamentary or local authority;
- 10.1.4 import or export regulations or embargoes;
- 10.1.5 strikes, lock-outs or other industrial actions or trade disputes (whether involving employees of the Company or of a third party);
- 10.1.6 difficulties in obtaining raw materials, labour, fuel, parts or machinery;
- 10.1.7 power failure or breakdown in machinery. In the event of the foregoing the Company may suspend further performance of the Contract for so long as it is so delayed or prevented and such suspension shall not constitute a breach of the Contract on the part of the Company. The Company shall inform the Customer in writing of any such suspension of performance of the Contract and if such suspension continues for more than 12 weeks either the Company or the Customer may by notice in writing to the other terminate the Contract but without prejudice to the Company's right to be paid in accordance with the Contract for any part of the Goods which may have been despatched to the Customer prior to the suspension of performance by the Company and to be reimbursed all other costs, charges and expenses incurred by the Company pursuant to the Contract up to the date of such notice of termination where it is given by the Company and up to the date of receipt thereof by the Company where it is given by the Customer.

11 Customers own Designs

- 11.1 The Customer shall be responsible for the accuracy of its own designs and drawings and other data supplied to the Company by the Customer its employees or agents notwithstanding that the Company may have examined, inspected, studied or commented to the Customer upon any such designs, drawings, specifications or other data.
- 11.2 If the Company is required in connection with the manufacture of the Goods to carry out any research or development work all intellectual property rights therein shall be the property of the Company and the Customer shall keep confidential all information disclosed by the Company to it concerning such research and development work and shall not exploit such information for its own purposes without the prior written consent of the Company provided that the foregoing provision shall not prevent the Customer from using the Goods for whatever purpose it may think fit.

12 Intellectual Property

- 12.1 The Customer warrants that any design or instruction furnished or given to the Company shall not be such as to cause the Company to infringe any letters patent registered designs or trademarks in the execution of the Customer's order. The Customer shall indemnify the Company against all claims actions and costs made or brought against the Company (whether in England or elsewhere) in respect of the infringement of any United Kingdom or foreign patent, trademark, trade name, registered design or similar right.

13 Breach of Contract by or Insolvency of the Customer

- 13.1 If any of the following events occurs or in the opinion of the Company is reasonably likely to occur:
- 13.1.1 the Customer commits any breach of the Contract; or
- 13.1.2 any distress or execution is levied upon any of the Goods or property of the Customer and is not paid out within 7 days; or
- 13.1.3 the Customer (or where the Customer is a partnership any partner thereof) offers to make any arrangements with or for the benefit of its or his creditors generally or a petition is presented to make the Customer or any such partner bankrupt; or
- 13.1.4 the Customer (being a limited company) has an Administrative Receiver or a Receiver and Manager appointed of the whole or any part of its undertaking property or assets or a petition is presented or an order is made or a resolution is passed for the winding up of the Customer or for the appointment of an Administrator thereof the Company may without prejudice to any other rights or remedies it may have against the Customer suspend further performance of the Contract or by notice in writing to the Customer terminate the Contract as it thinks fit. Notwithstanding any such suspension or termination, the Customer shall pay the Company in accordance with the Contract for all Goods despatched by the Company up to that date and shall indemnify the Company against any loss, liability or expense incurred by the Company in connection with the Contract including (without prejudice to the generality of the foregoing) loss of profit, liabilities and expenses in connection with raw materials and tooling obtained or produced for the purposes of the Contract and the cost of labour and overhead expenses reasonably attributable to the Contract.

14 Notices

- 14.1 Any notice to be given pursuant to these Conditions shall in the case of a notice to the Company be sent to it at its registered office and shall in the case of a notice to the Customer be sent to the Customer at its registered office if the Customer is a Company and in any other case to the address of the Customer last known to the Company. Any such notice may be given by post, telex or facsimile transmission. To prove service in the case of a notice given by post it shall be sufficient to show that the notice was despatched by first class recorded delivery service in a correctly addressed and adequately stamped envelope and to prove service in the case of a notice given by telex or facsimile transmission it shall be sufficient to show that it was made to the correct telex or telephone number. Service shall be deemed to have been effected 24 hours after despatch by post telex or facsimile transmission.

15 General

- 15.1 If any clause or sub-clause of these Conditions is held by any competent authority to be invalid or unenforceable in whole or in part, the validity of the other clauses or sub-clauses and the remainder of the provisions in question shall not be affected hereby.
- 15.2 The headings to these Conditions are inserted for ease of reference and shall not affect their construction.
- 15.3 The Company may subcontract any or all of its obligations hereunder without the prior consent of the Customer.
- 15.4 Any concession granted to the Customer by the Company or any waiver by the Company of its rights under these Conditions in respect of any particular transaction or series of transactions shall not be deemed an agreement to confer the same concessions in respect of any further transactions.
- 15.5 This contract shall not bestow any rights on any third parties and to this end the Contracts (Rights of third Parties) Act 1999 is excluded to the fullest extent possible.
- 15.6 The law applicable to this contract is English law and the Customer and the Company hereby submit to the exclusive jurisdiction of the Courts of England and Wales.

16 Returns

- 16.1 The Company is under no obligation to accept for return any unwanted or over-ordered goods.
- 16.2 Any surplus goods, for return, will only be considered providing that they do not exceed 10% of the invoice value.
- 16.3 All goods are subject to a re-handling charge and inspection by the Company before being accepted for return.
- 16.4 Special order items and finishes, and goods from construction sites, will not be accepted for return by the Company.
