About Scolmore

Since our incorporation in 1989 we have become a significant force in the electrical accessories market. We're proud to be a British based, family-run business, with an excellent track record of listening to what our customers need and providing the right solution every time.

Central Location - England

Based in the Midlands at our purpose built 150,000sq ft Head Office and Distribution Centre, we are ideally located to design, develop, manufacture and distribute our ever-expanding product range worldwide.

The Home of CLICK

We are committed to providing a comprehensive range of reliable, high quality and competitively priced products to our customers, whilst also offering a bespoke design and manufacture service to ensure we provide exactly the right solution and product for any installation or project. We're proud to say our customers can trust CLICK to get the job done!

Delivering New Products

Our New Product Development Team are constantly tracking market trends, approval standards and providing customised products according to unique specification. This ensures we continue to increase our product range to meet the ever-changing needs of our customers.

A People Business

Scolmore International is a Company that revolves around people – our team, our customers and the strong relationships we build and maintain through our consistent high levels of service and delivery.

MD, Gary Mordue strongly believes the dedication and skills of his team have contributed to the continuing success of Scolmore:

"The Company is very much built on people. Each individual makes a unique contribution to the business and its customers. The professionalism, skills and knowledge of our team throughout the business allow us to deliver every customer the product they need, when they need it, high quality at the best price."

Visitor Centre

This facility was opened in January 2009 and has been developed to give our customers the opportunity to view some of our product ranges in situ and see how they can be used to best effect.

The showroom can comfortably cater for parties of 24 and has all the facilities you would expect from a corporate venue. We actively encourage our customers to make use of these facilities for meetings and presentations.

We are happy to arrange product training sessions on request and look forward to welcoming people to the Visitor Centre.

CLICK®

A unique range of electrical products for all domestic electrical wiring needs...

Since its introduction the CLICK brand of domestic electrical wiring accessories has become synonymous with innovation, quality and unprecedented value for money.

OVIA

SECURITY, ENERGY SAVING, COMFORT & CONTROL FOR YOUR HOME OR BUSINESS

Upgrade your home...

INELS wireless control and automation products by Scolmore enable you to upgrade your electrical installation to provide added security, energy saving, comfort and control without the need for intrusive and unwanted disturbance to your décor.

Retro-fit and affordable, the products can be installed to transform any building to provide numerous benefits to suit all manner of requirements, both practical and aesthetic, that will bring added value to those using the building, whether it be a home or a business.

SECURITY

SIMULATED OCCUPANCY

Control of lighting (both internal and external) to create simulated occupancy

Leave lighting to turn off automatically when you leave for work

Have lighting, as well as audio devices such as radio's switch on and off during holidays to give your home that lived in appearance

OUTDOOR LIGHTING

Automatically switch on lights via presence detectors

Additional switching for multiple use (all the family can have a key fob to put external lights on as they approach the home)

Providing complete control via simple solutions

ENERGY SAVING

LIGHTING

Automatically turn off lighting and power when you want to. Central programmer enables you to programme lighting and power seven days a week

Last man out function – not sure if the upstairs lights are still on? Easily remedied by a master switch inside the front door to turn everything off when you leave and back on when you return

EXTERNAL POWER

Providing switching for external power so that sockets on the outside of buildings are only powered when you want to use them

Automatically switch on/off Christmas lighting so that it is only on when you want it to be

COMFORT

LIFE'S LITTLE LUXURIES

Creating scenes to provide added ambience for any situation around the home

Control children's rooms to restrict use of TV / gaming etc.

Provide timed access routes to create scenes such as "morning" or "bedtime"

ASSISTED LIVING

Provides flexibility to change an installation to meet changing requirements of the occupier

Use a bell push to switch a light on for the hard of hearing

Create a bedtime route that turns all lights on and off to allow the occupier to get to bed without needing to switch lights on/off

CONTROL

IN THE HOME

Change the use of a room – putting switches where you want them. Ideal for converting a downstairs room into a bedroom

IN THE OFFICE

Switches can be mounted on any surface – even glass

IN THE GARDEN

Wireless switching up to 200 metres

IN BUSINESS

Interacts with building management systems to provide additional control

COMMUNAL AREAS

Walkway lighting (hotels and commercial properties with interconnecting buildings)

Integrated approach for new lighting installation

More than 850 of Scolmore Group's Inceptor LED Downlights are providing a low energy lighting solution in a new £3.5m Apart-Hotel due to open in Piccadilly, Manchester this autumn.

Following Manchester City Council's decision to approve the change of use of the 41,500 sq ft Abacus Court office building - it is now being transformed by SACO Hotels to accommodate the city's latest European-style Apart-Hotel and will be known as SACO House upon completion during summer 2013.

Inceptor was specifically chosen above competitor products because it provides a solution to the issues surrounding restrictive ceiling voids. Inceptor is a high light output, high performance product that can be fitted into a recess depth of just 60mm - making it one of the most flexible fittings currently available.

Scolmore has also integrated its popular Flow Connectors into the product, which make it quick and easy to install, as well as to remove and replace for the purpose of circuit testing - another positive when selecting the right products for the job.

Paul Coffey from William Dyer Electrical Contractors has been responsible for the installation of the products and had this to say:

"We choose to use Inceptor LED downlights in the apartments because of their performance and build quality against price. We found them to be very competitive. They also offer other benefits - we were able to use them in the bathrooms because of their IP rating and we had a limited space in many of the ceiling voids so the ability to reduce the fitting depth was critical. Another advantage for us as a contractor is the installation method, where we can wire to the flow connectors and test the installation then simply click the fittings into place for the final commissioning. This offers the advantage of the fitting not being in place during the construction phase thereby totally reducing the chance of damage and extra costs to ourselves.

"A major deciding factor for the client was the warranty offered by Scolmore, which is five years. Upon completion the on-going maintenance is also easier for the client, because of the flow connector system an electrician is not required to change a fitting, you would simply plug a new one in. This has major benefits for our clients.

"It looks as though the Inceptor fitting is a simple downlight but it is much more than that with some very clever design features and excellent manufacturer backup."

Deco-rative Finish

The £10m refurbishment of the Radisson Blu Hotel Manchester Airport - the North's biggest hotel investment programme - is currently underway and Scolmore Group's wiring accessories have been specified for the newly renovated Business Class Bedrooms.

The iconic hotel, which originally opened in 1998, will be radically transformed over three phases. During the first and largest phase, all 120 of the Business Class Bedrooms and Suites have been fitted out with products from Scolmore's Deco decorative metal wiring accessories range.

Switches; socket power outlets; control switches; TV, telephone and data sockets; plus new media plates have all been supplied in a stainless steel finish to meet the brief for a stylish, contemporary look in keeping with the requirements of the top-end hospitality industry.

Chris Douglas of Castle Building Services, the contractor working on the project, says; "It was the breadth of products and choice of finishes, coupled with highly competitive pricing that attracted us to Scolmore. Having selected the Deco range for its high specification and high quality, we fitted out a sample room to demonstrate the overall look that could be achieved and the client approved it straightaway."

All Scolmore Group products are manufactured to the highest quality levels in the industry and comply with all relevant British and European standards, providing an innovative range to meet the needs of the hospitality trade as well as all commercial and domestic markets too.

Greater Manchester's Metrolink

The UK's largest urban tram network - Greater Manchester's Metrolink - is utilising Scolmore Group's Flow Connector system to help provide lighting at the Tram stops across the network.

Click Flow is an all-in-one junction box and connection system, which provides a quick and easy solution when adding lighting or appliances to an existing circuit.

The Hub CT300 is designed to accept the Flow range of 3 or 4 pin plug-in connectors and can be connected directly to another Hub or via the three options of 2M, 3M and 5M link cables which are also part of the range. CT103M and CT203M 3 pole and 4 pole male only connectors are also available to provide extra outgoing supplies from the Hub when required.

The Click Flow range also includes: The CT101C - the original 3 pin plug connector, now featuring increased load handling with 20A rating and with additional loop terminal. The CT102C & CT103C - 3 pin plug connectors with screw or fast fit cord restraint options. The CT202C & CT203C - 4-pin connectors with auxiliary terminals which provides the opportunity for a second switched live or permanent feed for use typically with emergency lighting applications

Metrolink is one of the most successful light rail systems in the UK, carrying around 22 million passengers every year. Since the first lines to Bury and Altrincham opened in 1992, the network has more than doubled in size, with lines to Eccles, Oldham and Rochdale, Droylsden, Chorlton and MediaCityUK bringing passengers into the heart of Manchester city centre.

Trams now run to 65 stops covering 70km of track – and the multi-million pound expansion of the system continues, with Metrolink set to become the largest urban tram network in the UK. With new lines, a fleet of state-of-the-art trams, on-stop ticket machines and improved passenger facilities and information, Metrolink is the UK's premier tram network.

A Modern Touch

Award-winning property developer, Dandara, has selected products from Scolmore Group's Definity Wiring Accessories range for one of its new Heritage Homes developments on the Isle of Man.

The new Springfield Rise development is described as a delightful semi-rural development of two, three and four bedroom mews, semi-detached and detached homes and it is situated on the outskirts of the village of Foxdale, just 15 minutes from the Island's capital.

Scolmore's Definity Screwless Flat Plate wiring accessories in chrome and brushed steel finishes have been installed throughout the downstairs accommodation of the two new show homes on the site by electrical contractors, Brew and Corkill. The products are also being installed as standard fittings throughout the new houses as they are being completed.

The screwless, flat-plate Definity wiring accessories met the specification requirements for a high quality, contemporary-styled range that provides flexibility.

Contractor, Brian Brew, commented: "The clean, modern aesthetics of Scolmore's Definity range played a key role in our choice, but we were also impressed with the flexibility that was offered due to the modular element of the range which allows you to effectively customise the plate according to your needs with a range of interchangeable, multi-functional modules."

Dandara has been building high quality residential and commercial properties since 1988 and over the years, the company has received over 50 industry accolades for architecture, design and quality.

Child's Play

Products from Scolmore Group's Wiring Accessories range have been specified and installed at the brand new Keele University Day Nursery which has just welcomed its first children through the doors.

Working harder for you

“At Scolmore the whole business is focused on the customer. Our forward thinking and investment for the future together with our dedicated employees enable a dynamic working environment that provides the platform for continued growth. It is our aim to provide the best possible package of products and service for our distributors and the installers who purchase and fit our products, ensuring that everyone gains maximum benefit when choosing our products.”

Ian Hunter
Sales Director

Stock

Over 7000 CLICK product lines with a stock value in excess of £5 million are held at our Central Distribution centre in the West Midlands at any one time. This means we are able to offer 97% availability on stock at any given time.

Warehouse / Service

Our centrally located 150,000sq ft Warehouse and Distribution Centre allow us to deliver our products on time every time.

Product Development

CLICK products are designed with our customer / the installer very much in mind. Our purpose built facilities and dedicated product development team, based in the UK allow us the flexibility to design and develop these products based on customer feedback and market research, ensuring we are producing a relevant, reliable and quality range of products.

Sales Structure

The external sales team has been significantly developed to enable Scolmore to meet the ever changing needs of the market, this development now sees the sales force able to offer dedicated contacts for both distributors and contractors at local level plus national accounts and specification cover available to generate demand with specific customers. This gives us the ability to have a focussed approach in line with our business development plans.

Distributor Network

Scolmore has over 2000 trading accounts providing a comprehensive network of wholesale outlets covering the whole of the UK. These are a combination of Independent Wholesalers, National Wholesale Groups and Buying Consortiums. The company sales strategy is to ensure that all Scolmore products are available local to the requirements of the installer and specifier.

In-House Studio

All marketing support including product literature and point of sale material is designed by our dedicated in-house design studio. This facility enables us to offer bespoke marketing support to our customers and the availability of an on-line Marketing Hub and dedicated Marketing Support brochure has provided Stockists of Click Products with a range of tools to enhance their own marketing activities.

Sales Office

Based alongside our distribution facility this busy sales office provides a central point of contact for all customer service requirements. The professionalism skills and knowledge of our internal sales team enables us to provide the high standard of service that we know our customers expect. Our on-line ordering facility is also managed within this office.

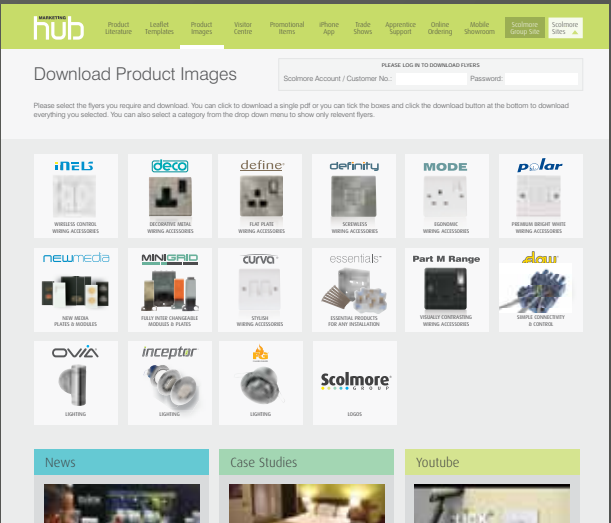

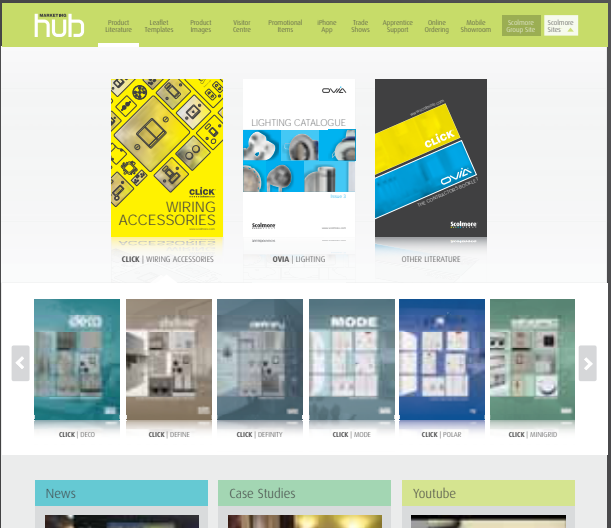

Mobile Showroom

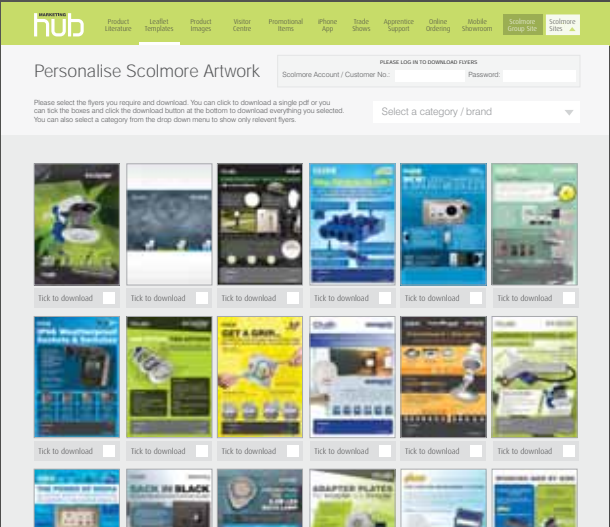

The eye-catching, branded truck transforms into a spacious and stylish showroom, fitted out with the very latest products which are mounted on display panels. With room for a hospitality table and concealed storage

for presentation materials and samples, the air conditioned, fully glazed unit provides an ideal space in which to host seminars and presentations and provide product training sessions for visitors.

Marketing Hub | marketing.scolmore.com

The Marketing Hub is the latest update to the Scolmore website giving customers the opportunity to enhance their own Marketing facilities with very little effort or cost. A selection of templates are available featuring many of our popular products. These templates can be customised with our stockists' details to provide maximum impact and optimise local sales opportunities.

www.scolmore.com

The Scolmore website showcases the full range of quality, cost effective products currently on offer. With regular updates on new products and details of developments within our business the site is a great source of information, keeping you fully up to date with the CLICK of a button.

Having recently updated the site to include links to product and service specific micro sites we aim to give you access to new information in a timely fashion. You can access these sites via links on the main site or by connecting directly. Either way you can be sure you will have the latest information at your fingertips.

Online Ordering | scolmoreonline.com

The updated site now incorporates a number of improved features that allow users to access new information directly and more easily:

- Ordering 24 hours a day 7 days a week with the ability to check current stock levels as required, meaning you are not restricted to ordering during normal office hours.
- Access to on-line catalogues will keep you fully updated with the complete product range and provide information on new products as and when they become available.
- The order tracking service keeps you up to date with the progress of your shipment.
- Managing your administration paper work is now even easier with instant access to reports and essential documents at a click of a button.
- A 'quick buy tab' and the ability to store the most common orders for repeated use, adds to the versatility and flexibility of the revised system.

To Register: E-mail us at sales@scolmore.com or call our Sales Office on 01827 63454 and one of our Sales Representatives will be more than happy to get you on-line.

Supporting our Industry

Scolmore is committed to supporting the Electrical Industry trade events including: ELEX, NICEIC Live, ECA, EDA, NAPIT, SELECT and SPARKS. We welcome the opportunity these events provide to showcase our product range and innovative new ideas to a wider audience.

iPhone app

The new app from Click Scolmore allows you to use your iPhone to browse our complete range of products, add products to your Favourites or to the Quote Basket. The app then allows you to email the contents of the basket back to yourself providing all the information you need to obtain any quotations.

With over 6000 products currently available you can use the search facility to easily locate the products required and if you require further information there's an option to email us or find us on the map straight from the app.

An added bonus is the app being 100% native means you don't have to be connected to the internet to use it.

ESP (Elite Security Products) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

Formed in 1985, the company focused its attention on providing innovative solutions for the evolving security market.

The emphasis of activity has been on the development of security related products specifically for the UK electrical trade. We have been keeping a close eye on the new technology that is emerging from the professional security sector and gauging the right time to introduce it to the electrical contract market.

In January 2012 ESP was acquired by the Scolmore Group. The arrangement sees the company continuing to trade as an independent entity in all of its major functions, whilst at the same time seeking to create strong growth over the coming years by utilising the experience and support of Scolmore.

ESP's comprehensive portfolio includes Exterior Deterrent systems, CCTV, Access Control, Video Door Entry and a growing collection of conventional and addressable Fire Alarm products.

UNICRIMP

Unicrimp is the latest new business to emerge from the successful Scolmore Group of companies. Its formation brings to the electrical contracting industry a comprehensive range of cable accessory products.

Launched under the Qcrimp brand name and available exclusively through the electrical wholesale trade, the product offering comprises an extensive range of cable management consumables.

All products within the Qcrimp range are manufactured under stringent quality control systems and are fully compliant with the very latest industry regulations. The range includes cable ties, crimp terminals, PVC tape, copper tube terminals, cable clips, and brass and nylon glands – providing everything required to harness cable between the consumer unit and the end accessory.

Aligned with the core values of the Scolmore group of companies, Unicrimp will offer the same levels of outstanding customer service, high quality products and commitment to new product development.

Located close to the Group Headquarters in the Midlands, the new Unicrimp distribution centre is ideally located to supply to all areas of the UK.

CLICK[®] Litehouse

ClickLitehouse is a joint venture operation between Litehouse Accessories Ltd and Scolmore International Ltd.

ClickLitehouse supplies a comprehensive range of domestic and semi commercial light fittings to the Electrical Wholesale market within Southern Ireland. We work in proud partnership with Scolmore International and supply a complete range of the market leading "Click" family of wiring accessories.

The ClickLitehouse range of Wiring accessories and Lighting products are supplied exclusively via the electrical wholesale trade and a network of approved stockists nationwide. All products are stored in our modern distribution facility based in Sandyford Industrial Estate, Dublin 18.

We strive to uphold our reputation for excellent service, High quality products and competitive pricing.

CLICK[®] International Pty Ltd

With the incorporation in 2012 of Click International Pty Ltd, the Australian electrical market welcomed one of the most respected and successful names in the wiring accessories, lighting and security industries - Scolmore International Ltd.

Now in its 25th year, Scolmore International is today one of the UK's leading manufacturers of electrical accessories and lighting products and has earned a reputation both here and around the world for quality, innovation and service.

Key to the continued success of the Scolmore Group is a commitment to new product development, which combines the very latest in technological advancements with cost-efficiency and ease of installation, to help contractors remain competitive and keep installers ahead of the game.

Operating as a privately owned company with head office and warehouse facilities in Melbourne, Click International aims to bring to the Australian electrical market a comprehensive range of quality, environmentally-responsible products including Wiring Accessories, Home Automation, low energy LED Lighting and External Area Security Protection.
