Why Click® INELS?

Significant energy savings

- Complete control of lighting and small power means energy is only consumed when needed - reducing your energy bills and carbon footprint.

Simple & flexible installation

- No additional cables or wall cutting needed.
Receivers can be installed behind light fittings or into suitable installation boxes and can be utilised with existing wiring.
- Flexible positioning makes Click® Inels ideal for installation within existing or newly constructed buildings. With Click® Inels, you can move switches freely and re-locate when required. Switches can be mounted on glass, wood or walls etc.
- Smart Switches are mainly powered by battery and so do not require any wiring or additional power supply.

- Universal input switch converts up to 4 push-button switches - enabling existing devices to be connected to the system.
- Operates on 868MHz frequency band which provides robust communications.

Complete control

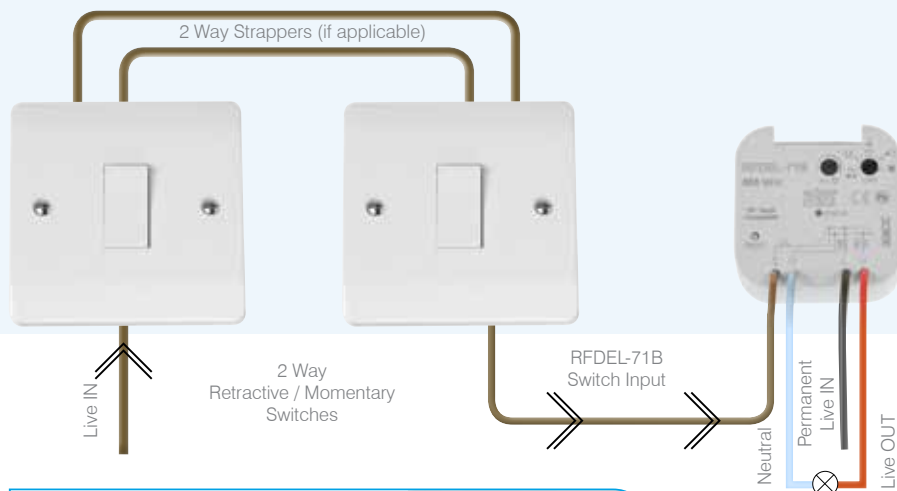

- Allows portable and remote control up to a distance of 200m
- Control and adjustment of lights, on/off or create lighting scenes.
- Control shutters, blinds, gates, latches and garage doors
- Manual or automatic control
- Monitor window or door opening
- Simulate occupancy when you are away from home

Smart Dimming

NEW

Our Click® Inels multifunction RF dimming receiver (RFDEL-71B) overcomes the issue of LED flicker which may occur with older dimmers.

Use the RFDEL-71B with existing wiring by changing the existing switch to a retractive or momentary switch...

Retractive Switch Control:

SHORT PRESS: Turn On / Off

PRESS & HOLD: Dim Up / Down

- Never have to worry about changing the dimmer in the future if the dimmable LED source is changed
- Compatible with the majority of dimmable LED sources available
- Suitable for dimming a single 5W dimmable LED source

- Will dim up to 160W of dimmable LED, halogen and CFL.
- Select between capacitive, LED, resistive and inductive loads
- 7 programming options.

SECURITY

SIMULATED OCCUPANCY

Control of lighting (both internal and external) to create simulated occupancy

Leave lighting to turn off automatically when you leave for work

Have lighting, as well as audio devices such as radio's switch on and off during holidays to give your home that lived in appearance

OUTDOOR LIGHTING

Automatically switch on lights via presence detectors

Additional switching for multiple use (all the family can have a key fob to put external lights on as they approach the home)

Providing complete control via simple solutions

ENERGY SAVING

LIGHTING

Automatically turn off lighting and power when you want to. Central programmer enables you to programme lighting and power seven days a week

Last man out function – not sure if the upstairs lights are still on? Easily remedied by a master switch inside the front door to turn everything off when you leave and back on when you return

EXTERNAL POWER

Providing switching for external power so that sockets on the outside of buildings are only powered when you want to use them

Automatically switch on/off Christmas lighting so that it is only on when you want it to be

COMFORT

LIFE'S LITTLE LUXURIES

Creating scenes to provide added ambience for any situation around the home

Control children's rooms to restrict use of TV / gaming etc.

Provide timed access routes to create scenes such as "morning" or "bedtime"

ASSISTED LIVING

Provides flexibility to change an installation to meet changing requirements of the occupier

Use a bell push to switch a light on for the hard of hearing

Create a bedtime route that turns all lights on and off to allow the occupier to get to bed without needing to switch lights on/off

CONTROL

IN THE HOME

Change the use of a room – putting switches where you want them. Ideal for converting a downstairs room into a bedroom

IN THE OFFICE

Switches can be mounted on any surface – even glass

IN THE GARDEN

Wireless switching up to 200 metres

IN BUSINESS

Interacts with building management systems to provide additional control

COMMUNAL AREAS

Walkway lighting (hotels and commercial properties with interconnecting buildings)

Smart Switches

240V Signal Repeater

(with un-switched 13A power outlet)

Extends the range up to 200m for up to 20 Smart Switches.

Standards: EN 50130-4, EN 55022, EN 60950, EN 60669, EN 300220, EN 301489 **RFRP-20/B:** EN 60730 / BS1363

Dimensions: **JA-82M:** 25mm x 192mm x 9mm, **JA-83M (Main):** 31mm x 75mm x 23mm, **(Magnet)** 16mm x 56mm x 15mm

JA-83P: 60mm x 85mm x 55mm, **RFRP-20/B:** 60mm x 12mm x 80mm

Battery Type: **JA-82M:** CR 2354 (x2), **JA-83M, JA-83P:** CR 123A (x1)

Smart Touch Controller

The Smart Touch Controller both transmits and receives signals within the smart system. This allows the status to be observed and over-ridden if necessary.

Automated control can also be added for when the property is occupied, (one set of times) and to simulate occupancy e.g. holiday mode (second set of times).

RFSA-61F, RFDEL-71F: 260mm x 52mm x 25mm

Cable Length: RFDEL-71B, RFDAC-71B: 90mm

Smart Wiring Accessories

Our CLICK® wiring accessory ranges are compatible with CLICK® Inels.

The switching and dimming receivers (RFSAI-61B and RFDEL-71B) can be utilised with momentary press switches (MD004).

This allows the CLICK® range of wiring accessories to be used with existing wiring to complement your installation.

We have now put these components together as a simple smart code for your convenience.

Pairing Sequence

Follow these simple instructions when pairing Smart Switches to receivers:

STEP 1 - ACTIVATE

Press & hold the 'programming' button on the receiver for 2 seconds (the status LED will flash with a 1 second interval).

STEP 2 - SELECT FUNCTION

To assign the chosen switch device button & function, press the required button the number of times to match the function number required at one second intervals - SEE TABLE 1 on opposite page (e.g for switch function 2, press the button 2 times).

STEP 3 - ONLY REQUIRED FOR FUNCTION 5 & 6 FOR ALL OTHER FUNCTIONS GO TO STEP 4

To set the time element, press & hold the 'programming' button again for >5 seconds (the status LED will flash twice in a 1 second interval). THE TIMER HAS NOW STARTED. When the required time period has elapsed, press the previously assigned switch button (IN STEP 2) once to confirm.

STEP 4 - SAVE AND EXIT

To exit programming mode press the 'programming' button for 1 second only.

TO DELETE A SINGLE FUNCTION

STAGE 1

PRESS AND HOLD FOR 5 SECONDS

STAGE 2

PRESS THE BUTTON THAT CORRESPONDS THE DESIRED FUNCTION TO DELETE

TO DELETE ALL STORED FUNCTIONS

PRESS AND HOLD 8 SECONDS - THIS WILL DELETE ALL STORED FUNCTIONS.

RELEASE PROGRAMMING BUTTON AND THEN PRESS FOR 1 SECOND TO EXIT
