

CASE STUDY DUNTON ENVIRONMENTAL HEAD OFFICE

ABOUT ORBIK 37 YEARS OF EXCELLENCE

Established in 1982, Orbik quickly developed into a highly respected manufacturer of lighting and safety products, all made to the most exacting standards.

Orbik are a go-to supplier to a large customer base across the UK, Europe and the Middle East and have won many prestigious projects within these markets over the years.

Orbik's purpose-built four acre facility in Aldridge in the West Midlands features state-of-the-art in-house production, including precision metal engineering and powder coating facilities.

Orbik have been issued with BSI Kitemark licences for over 400 of their products and today sit on the technical committees of BSI, ICEL and the LIA.

Orbik manufacture within quality system ISO 9001:2015 and together with a 100% test policy, our products provide our valued customers with the peace-of-mind that the product they are purchasing is not only fit for purpose but also made with the utmost care and attention to detail.

We are rightfully proud of the reputation that we have earned Worldwide as a supplier of high quality products and services and we have enthusiastically supported the improvement of quality standards within the lighting industry during our 37 year history.

OVERVIEW DUNTON ENVIRONMENTAL HEAD OFFICE

INTRODUCTION

Dunton Environmental have long established themselves as the specialists in environmental restoration, however their latest regeneration project was much more than just your everyday brownfield site; it was an old office building that was to be developed into Dunton's new company headquarters.

Having spent 10 years at their previous head office in Perry Barr, Dunton dedicated 2019 to the refurbishment of its very own, brand new, state of the art headquarters in Aldridge.

Lara Roe writes: "It has been a huge long-term goal of ours for Dunton to have its very own luxury office complex; something that we have strived and worked tirelessly for several years to create. We have always wanted to create a working environment for our staff that felt like home, and somewhere that they looked forward to spending their time."

THE PROJECT

Orbik were approached in early 2019 to design a fire detection system for the client's new headquarters. Our area sales manager attended site to undertake a survey of the premises and discovered that another lighting company had been commissioned to produce the lighting scheme. It was explained that Orbik are lighting manufacturers and local to the site and so the contractor and the health & safety manager were invited to the Orbik factory for a tour.

Impressed with what they saw, and being a supporter of local business and British manufacturing, we were offered the opportunity to produce a lighting design.

CRITERIA

Duntons goal was to create a working environment for their staff that felt like home, and somewhere that they looked forward to spending their time.

Amongst the various luminaires supplied on the project, the Arrian LED panel had to be adapted due to height restrictions (the ceiling height was 2.4m in places), and was pre-drilled so they could be fitted directly to the ceiling.

By identifying and responding to the specific requirements of the project, Orbik were able to develop, adapt and deliver an emergency lighting and fire alarm scheme that provides safety, efficiency and the visual comfort that Dunton had envisaged.

Standard Models Used:

Model Number Used: ED/LEDE/M3E

ARRIAN*

ARN/LED/4K ARN/LED/M3/4K

* In addition to the standard Arrian models, there were various adapted panels to suit the specific requirements of the project, such as panels with pre-drilled holes to fit existing ceiling fixings and versions where the LED driver was set to 60% of its operating capacity in order to achieve a required lighting appearance.
