

Di-LOG

...measurably better

17th Edition Lockout Kits

Di-log are now offering new range of lock-out kits. With the latest amendment to the 17th Edition Guidance Note 2 – Amendment 3, lock off devices and “Safe Isolation” procedures are being enforced across the UK by all monitoring bodies.

The **ISOPK1** & **ISOPK2** Kits incorporating the award winning CombiVolt™ 2 pole voltage testers, the fully conformant **PU260** and our all new Lock-Off kits. The PU260 is the first, 2 pole 690V voltage tester that will indicate if your voltage tester draws in excess of 3.5mA current, thus not conforming to the “Protection Against Electric Shock” and **BS EN 61243-3 2010**
