

## MASSIVE SAVINGS

Luceco, the global lighting brand from Luceco plc, is a £120m manufacturing business supplying high efficiency, energy saving LED luminaires to the trade, retail and specification markets.

Our reputation is based on the reliability and functionality of our innovative products. By offering market leading warranties, technical support, dedicated customer service and marketing backup, we aim to make it easy for customers to specify and install sustainable lighting.

The teams behind Luceco have over 100 years combined lighting industry experience gained over disciplines such as product design, development, testing and product management. This enviable expertise coupled with the group resources mean that Luceco have the knowledge and ability to be at the forefront of LED lighting technology.

Luceco believe that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance across all of our manufacturing and other business activities, continually looking for new methods and materials to provide environmentally friendly solutions.

Our international offices provide sales and support to the UK, Europe, Middle East, USA, Asia-Pacific and Africa.

# WARRANTY\*

## 1 YEAR ON SITE WARRANTY (UK ONLY)

Should a product that has been correctly specified, professionally installed by a registered trades person and operated in accordance with the specified parameters, fail during its first year of installation, Luceco will arrange for the product to be repaired or replaced at our discretion.

## 3 YEAR STANDARD WARRANTY\*\*

Luceco offers a standard 3 year warranty for non registered products. If a product was to fail during this period, Luceco will arrange for the product to be repaired or replaced with an equal or substitute product at our discretion.

## 5 & 7 YEAR EXTENDED WARRANTIES

Luceco offers 5 & 7 year\*\*\* extended warranties against selected products where the installation is registered on [www.luceco.com](http://www.luceco.com). Installations must be carried out by a approved contractor and in accordance with the terms and conditions detailed on the Luceco website.

For specific product warranty details please see page 141.

\*1 year on site warranty, 3 year warranty and 5 & 7 year extended warranties only available in the UK. Rest of the world may vary, please ask your local distributor for more information. ECO products not covered by 1 year on site warranty.

\*\*Work lights are limited to 2 year warranty.

\*\*\*For products with emergency control gear, the extended warranty is limited to **4 years** for the emergency components, due to the rated service life of the batteries.

# EU ENERGY LABELLING

Luceco LED products are characterised by very low energy consumption. Our luminaires are very effective and can meet the requirements of minimum Class A, many at A+ or A++.

The EU energy label gives information about the energy efficiency of a product. The label rates products from dark green (most efficient) to red (least efficient). Dark green rated products use less energy and help you to lower your energy bills and CO<sub>2</sub> emissions.

# LIGHTING INDUSTRY ASSOCIATION

The Lighting Industry Association is the largest lighting industry trade association in Europe. Their mission is to strengthen the industry and promote the benefits of good quality lighting by representing all aspects of UK, EU and international legislation and standards at the highest level whilst protecting the interests of both the public and its members.

## CARBON TRUST

The Carbon Trust is a world-leading organisation helping businesses, governments and the public sector to accelerate the move to a sustainable, low carbon economy through carbon reduction, energy-saving strategies and commercialising low carbon technologies.

As a Carbon Trust Accredited Supplier, Luceco joins a market-leading scheme for high quality energy efficient equipment and renewable technology suppliers. It provides independent validation and recognition of a supplier's skills and services - a much needed and trusted quality standard in a crowded and fast growing market place. Accredited Suppliers must meet or exceed criteria set by the Carbon Trust, designed to examine their capability to deliver thoughtful, well-designed, energy efficient and renewable energy systems.

## COST SAVINGS & ENERGY REDUCTION

Incandescent lighting converts only 5% of energy into light; the remaining energy is converted into heat. LEDs convert up to 80% of energy into light, so they greatly reduce power consumption.

Lighting accounts for approximately 30% of the power used in offices. LED therefore provides huge potential to **reduce electricity consumption** and its associated costs.

Other financial benefits include **less maintenance** (lamp change); **no expensive disposal** (unlike fluorescent lamps, LEDs contain no mercury or other harmful materials); and **improved staff productivity** (LED light provides a bright and pleasant working environment). **Air conditioning costs are also reduced** due to the lower amount of heat emitted from LED lighting, as well as life extension of the air conditioning unit because it is not worked so hard.

## ENHANCED CAPITAL ALLOWANCE

The Enhanced Capital Allowance (ECA) scheme is a key part of the Government's programme to manage climate change. It provides businesses with enhanced tax relief for investments in equipment that meets published energy-saving criteria. Luceco can offer a wide number of products that meet the eligibility criteria. Using ECA compliant luminaires can drastically improve ROI figures.

# Why LED?

## ENVIRONMENTALLY FRIENDLY

Fluorescent lighting contains mercury. LEDs do not. This makes LEDs safer both to use and dispose of. The mercury contained in just one fluorescent lamp is enough to contaminate 30,000 litres of water beyond safe drinking level limits. Fluorescent lamps are therefore classified as 'hazardous waste'.

## COST EFFECTIVE

The true cost of traditional lighting source is not only in its energy consumption. There is also maintenance over its lifetime, replacement labour and lamp outlay, and disposal costs. With LED, these costs don't exist. LED is a Fit-&-Forget solution.

## SAFE LIGHTING

LEDs emit minimal Ultra Violet light (UV). UV light attracts insects and can be harmful to skin, clothing and artwork. Heat emissions are greatly reduced with LED, which means they are cool to touch and perfect for heat sensitive applications.

## INSTANT LIGHT

LEDs produce 100% light instantly, with none of the warm up time required by fluorescents. Plus they are free of visible flicker - ideal to help prevent discomfort associated with traditional lighting.

## DURABILITY

LEDs do not contain a filament that can be damaged by shock and vibration - making LED one of the most stable light sources available.

## LONG LIFE

The life of LED is between 4 and 40 times greater than traditional products. What's more, they produce consistent light output over their entire life.
