

Switches

Modular Switches – the standard switch modules used in the Define® product are self coloured Ingot style switches which feature single screw fixing to the face plate.

Design flexibility is enhanced by availability of multi-function and fully interchangeable modules from the Minigrid™ range.

These non-furnished 1 & 2 gang plates offer the installer unprecedented flexibility in creating customised switch arrangements. A simple single screw fixing secures the required modules in position. A host of switching options can be achieved by selecting from our range of interchangeable modules.

All Define® switch plates are modular as standard, allowing you create virtually any switch plate you require e.g. Two way switch next to an intermediate switch (shown above).
