

**ER3/8 & ER5/8 - COPPER BOND EARTH ROD****Description:**

Copped 5/8 thread for extension purposes, both rods can be driven manually or by power hammer.

**Finish:**

Copper bonded thickness 0.25mm

**Material:**

High tensile low carbon steel

**Additional Notes:**

These rods come in two sizes.  
3/8" x 4' & 5/8" x 4'

These copper bonded earth rods are made from low carbon steel of grade BS 970 or AISI 1018 with a high tensile strength of at least 600 N/mm<sup>2</sup>. The low carbon steel core is molecularly bonded with 99.9% pure electrolytic copper.

**Features**

- Perfectly bonded rod will last longer, drive easier and will not crack.
- High tensile (600 N/mm<sup>2</sup>) low carbon steel of grade BS 970 or AISI 1018.
- Thread rolling process raises the surface of the rod, so that Thread dia. (T) is greater than Shank dia. (S).
- Copper Rods available in both 5/8" and 3/8".
