Chapter 52 Range: Fire Resistant Spacer Bar Saddles

Metpro Chapter 52® Fire Resistant spacer bar saddles are manufactured for use with PVC conduit and are compliant to BS7671 and BS8434-2

PREVENTS CABLE COLLAPSE

Cables are retained within the saddle strap ensuring safer environments for fire teams and civilians in fire situations

COLOUR MATCHED

Our white spacer bar saddles receive a surface coating that is colour matched to suit most UK systems with our range catering for both 20mm & 25mm PVC conduit

UK LABORATORY TESTED FOR 100% CONFIDENCE

Fire rated to 930°C for 120 minutes, our cable clips exceeded the stringent test requirements of BS8434-2 with full certification available on request

BS 7671: Chapter 52 Amendment

Amendment 3 of BS 7671 Wiring Regulations stipulates that “a suitable fire resistant means of support/retention must be provided to prevent cables falling out in the event of a fire”.

Fire Resistant Spacer Bar Saddles
