Not forgetting...

All of our series of Industrial Plugs & Sockets are produced strictly to International standard IEC60309-1&2 along with BS4343 and have approval through many European standards including, of course, CE. Plugs are coloured in line with International standards and made from a robust material with excellent impact resistance, dust proof, damp proof, waterproof (or watertight). The range is completely ROHS compliant and is individually packed and clearly labelled. Smart innovative casing design includes open and close switch for easy and fast access for wiring.
