

Telescopic Screw Gun Bracket

Features

- Allows faster box and conduit mounting
- Adjustable for non-standard stud spacing
- Requires only a screw gun for installation
- Compatible with boxes up to 54 mm in depth
- Works with a variety of CADDY® fasteners

The unique, one-piece, break-apart design of the TSGB Telescopic Screw Gun Bracket makes mounting multiple boxes easier than ever. Requiring only a screw gun for installation, the TSGB, part of the CADDY® line from ERICO®, is adjustable to allow non-standard stud spacing. It can mount multiple deep boxes up to 54 mm on the face or on the inside of the stud. The brackets feature an improved design with stamped markings to allow convenient identification and bending. The notches and markings enable faster and more precise box and conduit mounting between the studs. Pilot holes allow easy box attachment with only a screwdriver. The box attaches easily with self-tapping screws Part 187197, low-profile screw, is recommended. Cables and conduit attach to the TSGB brackets with either TPC clamps or CADDY® SUPERKLIP.
