Product Update Notice

PRODUCT: ADE GEN4 Range

What is the product update and why has it been introduced?

To ensure the Gen4 range is as user friendly as possible, Honeywell is introducing new universal icons to replace the current English text which is printed on the Gen4 range of panels and keypads. These icons are self explanatory and are widely used as standard in the security industry. The icon keypads simplify operation for end users, particularly for those whose native language is not English as well as for Elderly and partially sighted users who may struggle to read the small text descriptions on the keys.

What do the new icons mean?

Informa Speech Dialler

	Quit
	Telephone
	Test
	Play
	Record

LCD & LED Keypads

	Power
	System status
	Chime
	Omit
	Programme
	Set
	Reset
	Up arrow/Up menu level
	Tamper

	ADE Pro Kit	8EP409-UK	Replaces 8EP409

When will the new products be introduced and when will the old products become obsolete?

The new products will be phased in from June 2010. The old products will be phased out by the end of August 2010 and will be available until existing stocks are exhausted.

How does the update affect the product(s)/installations?

The changes are purely aesthetic and do not affect any operational or programming functions in the products. They are fully interoperable with the existing range of Gen4 control panels and accessories.

Will these new products have an impact on the product pricing?

There is no price difference between the old and the new part numbers, so your current prices will remain unchanged. An updated price book will be issued in due course.

How do I take advantage of the new product?

These products will be available from June 2010 onwards and will available through your sales channel.

Who do I contact for more information?

Please contact your local Honeywell Security & Communications local representative or the UK Sales Office on **01698 738 530**.
