

WIRED DOORCHIMES

The KingShield Wired Doorchime range, whether battery or transformer powered, has been specifically designed to complement all types of decor, whilst being simple and easy to install. The chime receiver is connected to the bell push/transmitter via bell wire. It is not connected to the mains power and therefore requires 3 x C cell LR14 batteries or transformer to operate.

- Clear sound
- Classic wired chime
- Traditional ding dong sound
- DHT01AN-C - Not suitable for use with illuminated bell pushes
