Wiring accessories

In addition to the aesthetics for the home owner the products have been designed to make the installation easier for electrical contractors.

Terminals designed to face in the same direction, with lead-ins for wiring, backed-off screws held captive to prevent loss, wire end stops and clear identification all help make the wiring and cabling much easier.

With the shallowest projection allowing more cabling space and faceplate overlap the final fitting is quicker and provides a neater finish.

The advantages for you:

- Terminals are easy to identify, access and tighten.
- Installation time is reduced.
- Termination remains secure when the product is pushed back to the box.
- Aesthetics are excellent, even if the back box is slightly proud of the wall.

Technical data:

- Product ranges have been independently tested and certified.
- Faceplates are made from high grade urea ensuring excellent scratch and impact resistance.
- All sockets are provided with our unique safety shutter ensuring the highest levels of protection.

Quick tips

1

Terminals

The terminals all face in the same direction for ease of installation and are clearly identified.

2

Terminal screws

Terminal screws are supplied backed out to save installation time and are captive so they won't be lost.

3

Lead ins

Moulded lead-ins help to guide the driver blade to the screw head.

4

Wire end stop

A positive wire end stop provides added security of connection.

5

Projection

The range has been designed to offer the shallowest projection possible in the back box, maximising space for cabling.

6

Overlap

The faceplate overlaps the back boxes to cover any discrepancies in the plaster or wall finish.

High quality

High quality face plates provide resistance to impact and heat for maximum robustness.

Independently tested

Product ranges have been independently tested and certified.
