

MOTION SENSOR NIGHT LIGHT BATTERY POWERED WHITE INTEGRAL

ILNLMS-CL-BAT

Safely navigate the dark without fumbling for a switch - fitted with a motion sensor that automatically switches on when you come within 3 meters. Automatically switches off if no movement is detected for 30 seconds.

The light also features an auto daylight sensor, meaning it will only come on in dark conditions, therefore saving battery life. A handy red light will appear when batteries are low, allowing you to swap them out without ever being left in the dark!

The soft, gentle glow offers a subtle illumination without waking the rest of the house up.

The Night Light is cool to touch and its low profile design will look stylish in any setting.
